Amateur Radio HF Antennas Claude Jollet, VE2DPE, **Amateur Radio HF Antennas** Claude Jollet, VE2DPE, The contents of this book are mostly aimed at the amateur radio beginner and aspiring ones Therefore this book provides answers to basic questions like What is the best HF antenna for my needs and location What type of stand alone antenna tuner should I use and which should I avoid How can I hide my HF antenna from the neighbors and still get acceptable performance from it What about lightning protection This book will supply immediately useful answers to the above questions and many more A properly designed and installed amateur radio HF antenna system can potentially make the humblest ham radio equipment perform like stations worth thousands of dollars We are confident that the antenna experimenter will find the information given here priceless Furthermore any ham radio operator armed with the information this book contains will become a much better informed buyer of commercially made HF antenna systems and accessories This special compendium edition is published in response to ham radio operators who wrote to ask that all the basic information on and related to amateur radio HF antennas be made available in one book instead of four arguing that it would be more convenient The author and publisher agree Therefore this edition contains the complete four book series on Amateur Radio HF Antennas published by Claude Jollet VE2DPE **Design of Shipboard HF Antennas for Broadband Characteristics** R. L. Goodbody, NAVAL OCEAN SYSTEMS CENTER SAN DIEGO CA., 1979 Typical US Navy ships have 5 to 19 hf transmitters and 6 to 24 or more hf receivers which must all be capable of operating simultaneously without mutual interference Achieving this capability is made difficult by rf currents induced on all the complex conducting shapes on the structure when electromagnetic energy is radiated or received The topside in effect acts as a complex antenna The topside has some highly undesirable shapes from the point of view of the antenna designer Prominent ship features such as corners masts and yard arms have a strong effect on hf antenna characteristics The antenna designer must therefore be sophisticated in the use of rf filters and in the placement and control of hf antennas and rf conductors in the ship s topside This document provides guidance in design of broadband hf antennas on ships It will be useful to engineers not familiar with Navy shipboard hf antenna systems It will also be useful to shipyard engineers in the determination of antenna construction techniques Author
