History of Anthropology, 1983 The Ethnographer's Magic and Other Essays in the History of Anthropology George W. Stocking, 1992 George Stocking has been widely recognized as the premier historian of anthropology ever since the publication of his first volume of essays *Race Culture and Evolution* in 1968 As editor of several publications including the highly acclaimed *History of Anthropology* series he has led the movement to establish the history of anthropology as a recognized research specialization In addition to the study *Victorian Anthropology* his work includes numerous essays covering a wide range of anthropological topics The eight essays collected in *The Ethnographer's Magic* consider the emergence of anthropology since the late nineteenth century as an academic discipline grounded in systematic fieldwork Drawing extensively on unpublished manuscript materials the essays focus primarily on Franz Boas and Bronislaw Malinowski the leading figures in the American and the British academic fieldwork traditions According to George Marcus of Rice University the essays represent the most informative and insightful writings on Malinowski and Boas and their legacies that are yet available Beyond their biographical material the essays here touch upon major themes in the history of anthropology its powerfully mythic aspect and persistent strain of romantic primitivism the contradictions of its relationship to the larger sociopolitical sphere its problematic integration of a variety of natural scientific and humanistic inquiries and the tension between its scientific aspirations and its subjectively acquired data To provide an overview against which to read the other essays Stocking has also included a sketch of the history of anthropology from the ancient Greeks to the present For this collection Stocking has written prefatory commentaries for each of the essays as well as two more

Anthropology and History Edward Evan Evans-Pritchard, 1961 **History of Anthropology** Alfred Cort Haddon, 1949 **A Social History of**

Anthropology in the United States Thomas C. Patterson, 2021-09-02 Thomas Patterson's text is one of very few comprehensive introductions to the social history of anthropology in the United States. In this new edition, he has fully revised each chapter, repositioned the dating and the grouping structure of relevant events, and added a totally new chapter which brings the discussion up to date in its focus on contemporary anthropology and anthropological theory from 2000 to 2017. At a time of intense political tension and flux, the questions of what anthropology is and what anthropologists do have resurfaced with new vigour. Patterson's investigation of the origins and formation of the discipline provides fascinating insights into the social history of America. Patterson addresses the negative reputation that anthropology took on as an offspring of imperialism and shows how this status is reductive and unhelpfully dismissive. Instead, he shows how anthropology was both implicated in those sociohistorical developments and critical of them at the same time. In fact, the dialogues which anthropologists have participated in amongst themselves have prevented them from perpetuating behaviour which could lead to allegations of imperialism and have instead enabled them to create a discipline that is characterised by a dialectical process. Patterson shows how his study of the historical development of anthropology in the United States illuminates the role of anthropology in the modern world through his examination of the circumstances that gave rise to it. For example, the shifting social and political economic conditions in which anthropological knowledge has been produced and shaped the appearance of practices centred in particular regions or groups, the place of anthropology in different power structures, and the role of the educator in forging perpetuating and changing representations of past and contemporary peoples. This is important reading for those interested in introducing themselves to the theory and practice of anthropology.

Murphy, 2021-03-01 For over twenty years *A History of Anthropological Theory* has provided a strong foundation for understanding anthropological thinking, tracing how the discipline has evolved from its origins to the present day. The sixth edition of this important text offers substantial updates throughout, including more balanced coverage of the four fields of anthropology, an entirely new section on the Anthropocene, and significantly revised discussions of public anthropology, gender and sexuality, and race and ethnicity. Written in accessible prose and enhanced with illustrations, key terms, and study questions in each section, this text remains essential reading for those interested in studying the history of anthropology. Colonial Subjects Peter Pels, Oscar Salemink, 2000 Probes the relationship between the conditions of colonial modernization and the methods of anthropological knowledge.

A History of Anthropology as a Holistic Science Glynn Custred, 2016-04-27 *A History of Anthropology as a Holistic Science* defends the holistic scientific approach by examining its history, which is in part a story of adventure and its sound philosophical foundation. It shows that activism and the holistic scientific approach need

not compete with one another This book discusses how anthropology developed in the nineteenth century during what has been called the Second Scientific Revolution It emerged in the United States in its holistic four field form from the confluence of four lines of inquiry the British the French the German and the American As the discipline grew and became more specialized a tendency of divergence set in that weakened its holistic appeal Beginning in the 1960s a new movement arose within the discipline which called for abandoning science as anthropology's mission in order to convert into an instrument of social change a redefinition which weakens its effectiveness as a way of understanding humankind and which threatens to discredit the discipline

A History Of Anthropology Thomas Hylland Eriksen, 2008-01-01 A Social History of Anthropology in the United States , 2001 *Centering the Margins of Anthropology's History* Regna Darnell, 2021-05

The series *Histories of Anthropology Annual* presents diverse perspectives on the discipline's history within a global context with a goal of increasing the awareness and use of historical approaches in teaching learning and conducting anthropology The series includes critical comparative analytical and narrative studies involving all aspects and subfields of anthropology

Volume 14 *Centering the Margins of Anthropology's History* focuses on the conscious recognition of margins and suggests it is time to bring the margins to the center both in terms of a changing theoretical openness and a supporting body of scholarship if not to problematize the very dichotomy of center and margins itself The essays explore two major themes of anthropology's margins First anthropologists and historians have long sought out marginalized and forgotten ancestors arguing for their present day relevance and offering explanations for the lack of attention to their contributions to theory analysis methods and findings Second anthropologists and their historians have explored a range of genres to present their results in provocative and open ended formats This volume closes with an experimental essay that offers a dynamic multifaceted perspective that captures one of the dominant if sometimes marginalized voices in history of anthropology

Steven O Murray's career developed at the institutional margins of several academic disciplines and activist discourses but his distinctive voice has been and will remain at the center of our history

A History of Anthropology Thomas Hylland Eriksen, Finn Sivert Nielsen, 2013 Thoroughly updated and revised edition of a popular classic of modern anthropology
