Jenks,Robert Herring Wright,1913 **The Making of an Economist, Redux** David Colander,2008-11-17 Economists seem to be everywhere in

the media these days But what exactly do today s economists do What and how are they taught Updating David Colander and Arjo Klamer s classic *The Making of an Economist* this book shows what is happening in elite U S economics Ph D programs By examining these programs Colander gives a view of cutting edge economics and a glimpse at its likely future And by comparing economics education today to the findings of the original book the new book shows how much and in what ways the field has changed over the past two decades The original book led to a reexamination of graduate education by the profession and has been essential reading for prospective graduate students Like its predecessor *The Making of an Economist Redux* is likely to provoke discussion within economics and beyond The book includes new interviews with students at Harvard Princeton Stanford MIT Chicago and Columbia In these conversations the students the next generation of elite economists colorfully and frankly describe what they think of their field and what graduate economics education is really like The book concludes with reflections by Colander Klamer and Robert Solow This inside look at the making of economists will interest anyone who wants to better understand the economics profession An indispensable tool for anyone thinking about graduate education in economics this edition is complete with colorful interviews and predictions about the future of cutting edge economics **The Purpose of the Business School** Edward W. Miles,2019-03-26 In the mid 20th

century university based business schools re oriented themselves to increased alignment with the preferences of the university and decreased alignment with the preferences of business This re alignment has caused multiple observers to question the effectiveness of current day business schools For example recent discussions have lamented that business schools are engaged in research that does not influence the practice of business This book engages these debates arguing that all judgments about the effectiveness of business schools are rooted in assumptions about what the purposes of the business school appropriately are and that many of those assumptions are unstated and not subjected to debate The author weaves a unique blend of complexity theory philosophy of science and the nature of professions to articulate those goals and assess the effectiveness at meeting them The book traces parallel discussions regarding the purpose of the university in the writings of Aristotle and Wilhelm von Humboldt and ties those discussions to current debates This book will inform business faculty and administrators of the degree to which university based business schools are balancing multiple purposes which

include discovery of knowledge creating knowledge that informs the practice of business training professionals and instilling ethical principles in its training of those professionals *British Qualifications 2014* Kogan Page Editorial Staff,2013-12-03
