British Insurance Law Association Book Prize this timely expertly written book looks at the legal impact that the use of Big Data will have on the provision and substantive law of insurance Insurance companies are set to become some of the biggest consumers of big data which will enable them to profile prospective individual insureds at an increasingly granular level More particularly the book explores how i insurers gain access to information relevant to assessing risk and or the pricing of

premiums ii the impact which that increased information will have on substantive insurance law and in particular duties of good faith disclosure and fair presentation of risk and iii the impact that insurers new knowledge may have on individual and group access to insurance This raises several consequential legal questions i To what extent is the use of big data analytics to profile risk compatible at least in the EU with the General Data Protection Regulation ii Does insurers ability to parse vast quantities of individual data about insureds invert the information asymmetry that has historically existed between insured and insurer such as to breathe life into insurers duty of good faith disclosure And iii by what means might legal challenges be brought against insurers both in relation to the use of big data and the consequences it may have on access to cover Written by a leading expert in the field this book will both stimulate further debate and operate as a reference text for academics and practitioners who are faced with emerging legal problems arising from the increasing opportunities that big data offers to the insurance industry **The Oxford Handbook of Children's Rights Law** Jonathan Todres, Shani M. King, 2020-02-19

Children's rights law is a relatively young but rapidly developing discipline The U N Convention on the Rights of the Child the field's core legal instrument is the most widely ratified human rights treaty in history Yet like children themselves children's rights are often relegated to the margins in mainstream legal political and other discourses despite their application to approximately one third of the world's population and every human being's first stages of life Now thirty years old the Convention on the Rights of the Child CRC signalled a definitive shift in the way that children are viewed and understood from passive objects subsumed within the family to full human beings with a distinct set of rights Although the CRC and other children's rights law have spurred positive changes in law policies and attitudes toward children in numerous countries implementation remains a work in progress We have reached a state in the evolution of children's rights in which we need more critical evaluation and assessment of the CRC and the large body of children's rights law and policy that this treaty has inspired We have moved from conceptualizing and adopting legislation to focusing on implementation and making the content of children's rights meaningful in the lives of all children This book provides a critical evaluation and assessment of children's rights law including the CRC With contributions from leading scholars and practitioners from around the world it aims to elucidate the content of children's rights law explore the complexities of implementation and identify critical challenges and opportunities for children's rights law *Religious Freedom and the Law* Brett G. Scharffs, Asher Maoz, Ashley Isaacson Woolley, 2018-08-06

Britain's rural Muslims Sarah Hackett,2020-06-06 Immigration has long been associated with the urban landscape from accounts of inner city racial tension and discrimination during the 1960s and 1970s and studies of minority communities of the 1980s and 1990s to the increased focus on cities amongst contemporary scholars of migration and diaspora Though cities have long provided the geographical frameworks within which a significant share of post war migration has taken place Sarah Hackett argues that that there has long existed a rural dimension to Muslim integration in Britain This book offers the first comprehensive study of Muslim migrant integration in rural Britain across the post 1960s period examining the previously unexplored relationship between Muslim integration and rurality by using the county of Wiltshire in the South West of England as a case study Drawing upon a range of archival material and oral histories it challenges the long held assumption that local authorities in more rural areas have been inactive and even disinterested in devising and implementing migration integration and diversity policies and sheds light on smaller and more dispersed Muslim communities that have traditionally been written out of Britain s immigration history

Governing Shale Gas John Whitton,Matthew Cotton,Ioan M. Charnley-Parry,Kathy Brasier,2018-07-27 Shale energy development is an issue of global importance The number of reserves globally and their potential economic return have increased dramatically in the past decade Questions abound however about the appropriate governance systems to manage the risks of unconventional oil and gas development and the ability for citizens to engage and participate in decisions regarding these systems Stakeholder participation is essential for the social and political legitimacy of energy extraction and production what the industry calls a social license to operate This book attempts to bring together critical themes inherent in the energy governance literature and illustrate them through cases in multiple countries including the US the UK Canada South Africa Germany and Poland These themes include how multiple actors and institutions industry governments and regulatory bodies at all scales communities opposition movements and individual landowners have roles in developing contesting monitoring and enforcing practices and regulations within unconventional oil and gas development Overall the book proposes a systemic participatory community led approach required to achieve a form of legitimacy that allows communities to derive social priorities by a process of community visioning This book will be of great relevance to scholars and policy makers with an interest in shale gas development and energy policy and governance

Lessons from the Fuel Tax Protests of 2000 Kiron Chatterjee, 2017-07-05 The UK fuel tax protests of September 2000 generated considerable debate about fuel prices and taxation and put transport in the media spotlight Away from the immediate events and debates surrounding the protests the experience offered the opportunity for longer term lessons on transport to be gained The editors of this volume Glenn Lyons and Kiron Chatterjee saw the opportunity to get fresh insight into car dependence and conducted a large scale travel behaviour survey to find out how car users coped when restricted in being able to buy petrol This book presents their findings and collects together articles written by other researchers on a range of topics including fuel taxation transport pricing policy acceptability travel behaviour and goods distribution

Contested Property Claims Maja Hojer Bruun, Patrick Joseph Cockburn, Bjarke Skærlund Risager, Mikkel Thorup, 2017-12-01 Property relations are such a common feature of social life that the complexity of the web of laws practices and ideas that allow a property regime to function smoothly are often forgotten But we are quickly reminded of this complexity when conflict over property erupts When social actors confront a property regime for example by squatting they enact what can be called contested property claims As this book demonstrates these confrontations raise crucial issues of social justice and show the ways in which property conflicts often reflect wider social conflicts Through a series of case studies from across the globe this multidisciplinary anthology brings together works from anthropologists legal scholars and geographers who show how exploring contested property claims offers a privileged window onto how property regimes function as well as an illustration of the many ways that the institution of property shapes power relationships today

Employment Law in Context David Cabrelli, 2020 This publication offers a rich learning resource combining extracts from leading cases and articles with insightful author commentary This approach places employment law in context enabling the reader to develop a clear and sophisticated understanding of this dynamic area *Energy Storage Options and Their Environmental Impact* R E Hester, R M Harrison, 2018-10-18 Recent decades have seen huge growth in the renewable energy sector spurred on by concerns about climate change and dwindling supplies of fossil fuels One of the major difficulties raised

by an increasing reliance on renewable resources is the inflexibility when it comes to controlling supply in response to demand. For example, solar energy can only be produced during the day. The development of methods for storing the energy produced by renewable sources is therefore crucial to the continued stability of global energy supplies. However, as with all new technology, it is important to consider the environmental impacts as well as the benefits. This book brings together authors from a variety of different backgrounds to explore the state of the art of large scale energy storage and examine the environmental impacts of the main categories based on the types of energy stored. A valuable resource not just for those working and researching in the renewable energy sector but also for policymakers around the world.

A Critical Discourse Analysis of South Asian Women's Magazines Linda McLoughlin, 2017-07-03. This intriguing book applies Critical Discourse Analysis to a range of South Asian women's lifestyle magazines, exposing the disconnection between the magazines' representations of South Asian women and the lived realities of the target audience. The author challenges the notion that discourses of freedom and choice employed by women's magazines are emancipatory, demonstrating instead that the version of feminism on offer is a commodified form which accords with the commercial aims of the publications. McLoughlin demonstrates that whilst British magazines present women in the East as the exotic and culturally superior Other, women in India are encouraged to emulate Western women to signify their engagement with globalization and modernity. She uses data from focus groups carried out in both countries to illustrate the interpretive frameworks and multivocality of participants' attitudes, experiences, and beliefs. This thought-provoking book will appeal to students and researchers of Language and Linguistics, Women's Studies, Anthropology, Sociology, Media Communications, and Cultural Studies.
