Kenrick, David E. Lundberg-Kenrick, 2022-05-17 Like our ancestors we must do our best to survive form friendships win respect attract mates and care for our families In the 21st century however the threats to our survival are sometimes hidden This book presents evolutionary science based advice for fending off our modern attackers and learning how to be happy in the modern world *What We Are: The Evolutionary Roots of Our Future* Lonnie Aarssen, 2022-07-05 Other animals are driven to spend essentially their whole lives just trying to get fed stay alive and get laid That s about it The same was true for our proto human ancestors And modern humans of course also require a Survival Drive and a Sex Drive in order to leave descendants But today we spend most of our lives mainly just trying to convince ourselves that our existence is not absurd In What We Are Queen s University biologist Lonnie Aarssen traces how our biocultural evolution has shaped Homo sapiens into the only creature that refuses to be what it is the only creature preoccupied with a deeply ingrained and absurd sentiment I have a distinct mental life an inner self that exists separately and apart from material life and so unlike the latter need not come to an end This delusion conceivably gave our distant ancestors some wishful thinking for finding some measure of relief from the terrifying uniquely human knowledge of the eventual loss of corporeal survival But this came with an impulsive nagging doubt an obsessive underlying uncertainty self impermanence anxiety Biocultural evolution however was not finished It also gave us two additional uniquely human primal drives both serving to help quell the burden of this anxiety Legacy Drive generates delusional cultural domains for extension of self and Leisure Drive generates pleasurable cultural domains for distraction escape from self Legacy Drive and Leisure Drive Aarssen argues represent two of the most profound consequences of human cognitive and cultural evolution What We Are advances propositions regarding how a visceral susceptibility to self impermanence anxiety has paradoxically played a pivotal role in rewarding the reproductive success of our ancestors and has thus been a driving force in shaping fundamental motivations and cultural norms of modern humans More than any other milestone in the evolution of human minds self impermanence anxiety and its mitigating Drives for Legacy and Leisure account for not just the advance of civilization over the past many thousands of years but also now its impending collapse Effective management of this crisis Aarssen insists will require a deeper and more broadly public understanding of its Darwinian evolutionary roots as laid out in What We Are

Cognitive Narrative Thematics Daniel Candel, 2023-12-22 *Cognitive Narratives Thematics* proposes a new way in which narrative works organise their thematic material It rehabilitates the study of what books are about by providing a cognitive narrative thematic model CNT Part I presents CNT by combining different approaches to narrative such as evolutionary theory semiotics possible worlds theory or rhetorical criticism Part II applies CNT to a variety of well known narratives in different modalities such as Robert Browning's *My Last Duchess* Julia Donaldson's *The Gruffalo* Maurice Sendak's *Where the Wild Things Are* Frank Miller's *300* or Mike Mignola's *Hellboy* It also considers literary histories and digital humanities Daniel Candel shows that CNT deserves greater attention and that thematics generates its own forms and adds to the aesthetic pleasure of the text Candel illustrates that CNT improves the established interpretations of the narrative works it studies

This innovative study reveals how CNT offers readers a deeper understanding and how readers and critics are often using CNT intuitively without being aware of it It is an invaluable resource for students and scholars of narrative theory
