*The Legal Regime of Straits* Hugo Caminos, Vincent P. Cogliati-Bantz, 2014-12-22 The right of transit passage in straits and the analogous right of archipelagic sealanes passage in archipelagic states negotiated in the 1970s and embodied in the 1982 UNCLOS sought to approximate the freedom of navigation and overflight while expressly recognising the sovereignty or jurisdiction of the coastal state over the waters concerned However the allocation of rights and duties of the coastal state and third states is open to interpretation Recent developments in state practice such as Australia s requirement of compulsory pilotage in the Torres Strait the bridge across

the Great Belt and the proposals for a bridge across the Strait of Messina the enhanced environmental standards applicable in the Strait of Bonifacio and Canada's claims over the Arctic Route make it necessary to reassess the whole common law of straits The Legal Regime of Straits examines the complex relationship between the coastal state and the international community **17th SESSION 1991 (Resolutions 680-732)**, 1992 **A Guide to the Collision Avoidance Rules** Alfred Norman Cockcroft, J. N. F. Lameijer, 1990 This is the definitive work on the Collision Avoidance Rules for all concerned with the practical and legal aspects of their interpretation This new edition incorporates the 1993 Amendments to the International Regulations for Preventing Collisions at Sea 1972 which came into force in 1995 The book sets out all the Rules with clear comments on their meaning and on the significance of the changes and with excerpts from Court judgements that show how they have been interpreted in law Arrangements of lights and signals are illustrated in colour and diagrams explain certain aspects of the Steering and Sailing Rules Federal Register, 2003-12 **The Management of Maritime Regulations** Hristos Karahalios, 2015-06-19 Ship management is a worldwide activity Modern ships are sophisticated designed structures equipped with several automatic devices It is estimated that 90 per cent of commodities transported worldwide are carried by ships Therefore there is great interest from many private and public organizations that those ships are operating manned designed and maintained within international acceptable standards The obligation of stakeholders to comply with maritime regulations is included in most statutory and commercial agreements and therefore inadequate implementation of maritime regulations exposes stakeholders to commercial risks This book explores how the application of mathematical decision making tools could be used to manage maritime regulations Performance management tools are proposed which would allow stakeholders to monitor the regulatory performance of their organization in order to reduce or eliminate those commercial risks The process of introducing an implementation process for maritime regulations worldwide is described within this text An emphasis is put on the role of main stakeholders in the regulatory process and reasons that increase the willingness of stakeholders to participate in the implementation of regulations This book will be of interest to scholars and students interested in the management of the shipping industry as well as ship owners and managers who are charged with implementing maritime regulations
