Trauma Case Studies for the Paramedic Stephen J. Rahm, 2005 This text is intended to reinforce the importance of a systematic patient assessment and management approach to paramedic students by presenting them with 20 case studies on the most important trauma emergencies they are likely to encounter in the field emergencies

Medical Case Studies for the Paramedic American Academy of Orthopaedic Surgeons (AAOS), Stephen J. Rahm, 2009-04-06 Medical Case Studies for the Paramedic contains 20 case studies representing a variety of medical emergencies that the paramedic may encounter in the field Each case study begins by presenting dispatch information and a general impression of the patient upon arriving at the scene Then as the case progresses pertinent patient information is provided interspersed with a series of standardized questions designed to assess the paramedic's ability in correlating specific signs and symptoms with a particular medical condition and providing the appropriate treatment

Pediatric Case Studies for the Paramedic Stephen J. Rahm, 2006 Children are not simply adults They commonly present with unique problems that are typically not encountered in older patients These unique problems require the paramedic to alter to some degree his or her approach to the sick or injured child Because a relatively small percentage of EMS calls involve a critically ill or injured child it is common for the paramedic to experience anxiety when such a call is received Pediatric Case Studies for the Paramedic contains 20 case studies representing a variety of pediatric emergencies that paramedics may encounter in the field

Critical Care Study Guide Gerard J. Criner, Gilbert E. D'Alonzo, 2013-03-09 Critical care medicine is a dynamic and exciting arena where complex pathophysiologic states requiring extensive knowledge and clinical acumen are commonly found Caring for critically ill patients requires an extensive knowledge of basic pathophysiology as well as awareness of the appropriate diagnostic tests and therapeutic interventions Because this knowledge base crosses many different disciplines introduction to caring for the intensive care patient while exciting may also be intimidating This textbook is designed toward making the dynamic environment of the critical care unit understandable and the approach to the patient both logical and successful The book contains three components 1 description of the procedural tasks commonly performed for the critically ill patient 2 explanation of the most common pathophysiologic states encountered and 3 description of specific disease entities with details of their differential diagnosis diagnostic strategy and therapeutic plan This book also uses several educational approaches that we have found useful in our own teaching sessions and prior textbooks Clinical cases introduce chapters and highlight chapter segments to emphasize clinical relevancy As an additional study aid margin notes highlight important teaching points and facilitate easy review of chapter content To consolidate the principles outlined in each chapter review questions with full text explanations are provided at the end of each chapter All these elements help reinforce the most important messages for the reader
