

SAUNDERS NCLEX_DEVELOPMENTAL FINAL EXAM QUESTIONS WITH CORRECT ANSWERS

The maternity nurse is providing instructions to a new mother regarding the psychosocial development of the newborn infant. Using Erikson's psychosocial development theory, the nurse instructs the mother to take which measure?

1.
Allow the newborn infant to signal a need.
2.
Anticipate all needs of the newborn infant.
3.
Attend to the newborn infant immediately when crying.
4.
Avoid the newborn infant during the first 10 minutes of crying. - Answer-ANS: 1. Allow the newborn infant to signal a need

Rationale:

According to Erikson, the caregiver should not try to anticipate the newborn infant's needs at all times but must allow the newborn infant to signal needs. If a newborn infant is not allowed to signal a need, the newborn will not learn how to control the environment. Erikson believed that a delayed or prolonged response to a newborn infant's signal would inhibit the development of trust and lead to mistrust of others.

The nurse educator is preparing to conduct a teaching session for the nursing staff regarding the theories of growth and development and plans to discuss Kohlberg's theory of moral development. What information should the nurse include in the session? Select all that apply.

1.
Individuals move through all 6 stages in a sequential fashion.
2.
Moral development progresses in relationship to cognitive development.
3.
A person's ability to make moral judgments develops over a period of time.
