Scott Courtney Ph D:

The 'Resource' Approach to Mathematics Education Luc Trouche, Ghislaine Gueudet, Birgit Pepin, 2019-11-29 This edited volume will help educators better analyze methodological and practical tools designed to aid classroom instruction. It features papers that explore the need to create a system in order to fully meet the uncertainties and developments of modern educational phenomena. These have emerged due to the abundance of digital resources and new forms of collective work. The collected papers offer new perspectives to a rising field of research known as the Documentational Approach to Didactics. This framework was first created by the editors of this book. It seeks to develop a deeper understanding of mathematics teaching expertise. Readers will gain insight into how to meet the theoretical questions brought about by digitalization. These include how to analyze teachers' work when they prepare for their teaching, how to conceptualize the relationships between individual and collective work, and how to follow the related processes over the long term. The contributors also provide a comparative view in terms of contrasting selected phenomena across different educational cultures and education systems. For instance, they consider how differences in curriculum resources are available to teachers and how teachers make use of them to shape instruction. Coverage also considers the extent to which teachers make use of additional material, particularly those available through the global marketplace on the Internet. This book builds on works from the Resources 2018 Conference. Understanding teachers' work through their interactions with resources for teaching held in Lyon, France.

Brown, 2025-08-21 Institutions represent and pass on philosophies, values, and goals that help define and propagate the cultures they represent. When those cultures experience massive changes, their goals, values, and philosophies are significantly challenged. Over the last several decades, perhaps nothing in the culture of Protestant and evangelical church life has changed more than corporate worship. Institutions called to train leaders for the music and worship ministries in local churches have experienced no less upheaval than the churches they serve. Although the Southern Baptist Theological Seminary has trained church leaders for music and worship leadership in various ways since 1859, the period between 1980 and 2019 arguably saw the most significant upheaval. In the face of changing job competencies, large cultural shifts, and changes in educational philosophy, the faculty and administrators of Southern Seminary honorably manifested Joachim Neander's phrase: Ponder anew what the Almighty can do. Through its data-infused narrative, Ponder Anew seeks to provide a case study understanding how institutions and churches can fulfill their mission in the midst of significant and sometimes tumultuous transition. **The Case for Climate Change Action** United States.
