Handbook of Security Studies Myriam Dunn Cavelty, Victor Mauer, Thierry Balzacq, 2009-12-16 Pt 1 Theoretical approaches to security and different securities pt 2 Contemporary security challenges pt 3 Regional security challenges pt 4 Confronting security challenges *Transformations of Security Studies* Gabi Schlag, Julian Junk, Christopher Daase, 2015-10-30 This volume brings together a group of distinguished scholars to engage in a dialogue on key developments in the study of security The book provides a comprehensive overview of theoretical empirical and methodological developments within security studies whose political and societal importance has grown significantly in recent years By bringing together scholars who hold differing perspectives on security this volume provides insights into a variety of approaches and their newest developments including mainstream as well as heterodox perspectives on security Thus it aims to build bridges of communication between different camps by initiating a dialogue on the identity and diversity of security studies It does so in three parts The first part of the book includes paradigmatic approaches to security that are closely connected to major debates in International Relations such as realism institutionalism constructivism as well as approaches to the culture ethics of security and critical security studies The second part places emphasis on the broadening and deepening of the concept of security in recent decades It discusses key empirical frontiers including the continued centrality of the state the link between democracy and security environmental security as well as financial security The third part of the book presents various methodological approaches to the question of security and peace It provides an overview of new approaches such as the visual turn quantifying security and method combinations This book will be of much interest to students of critical security studies international relations and research methods *Secrecy and Methods in Security Research* Marieke De Goede, Esmé Bosma, Polly Pallister-Wilkins, 2019-08-13 This book analyses the challenges of secrecy in security research and develops a set of methods to navigate encircle and work with secrecy How can researchers navigate secrecy in their fieldwork when they encounter confidential material closed off quarters or bureaucratic rebuffs This is a particular challenge for researchers in the security field which is by nature secretive and difficult to access This book creatively assesses and analyses the ways in which secrets operate in security research The collection sets out new understandings of secrecy and shows how secrecy itself can be made productive to research analysis It offers students PhD

researchers and senior scholars a rich toolkit of methods and best practice examples for ethically appropriate ways of navigating secrecy It pays attention to the balance between confidentiality and academic freedom and integrity The chapters draw on the rich qualitative fieldwork experiences of the contributors who did research at a diversity of sites for example at a former atomic weapons research facility inside deportation units in conflict zones in everyday security landscapes in virtual spaces and at borders bureaucracies and banks The book will be of interest to students of research methods critical security studies and International Relations in general The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

International Relations' Last Synthesis? J. Samuel Barkin, Laura Sjöberg, 2019-02-12 Many scholars intentionally or unintentionally have entangled constructivisms and critical theories in problematic ways either by assigning a critical theoretical politics to constructivisms or by assuming the appropriateness of constructivist epistemology and methods for critical theorizing IR's Last Synthesis makes the argument that these connections mirror IR's grand theoretical syntheses of the 1980s and 1990s and have similar constraining effects on the possibilities of IR theory They have been made without adequate reflection in contradiction to the base assumptions of each theoretical perspective and to the detriment of both knowledge accumulation about global politics and theoretical rigor in disciplinary IR By rejecting its over simple syntheses this book hews a road toward reviving IR theorizing

Researching Non-state Actors in International Security Andreas Kruck, Andrea Schneiker, 2017-04-28 This volume provides researchers and students with a discussion of a broad range of methods and their practical application to the study of non state actors in international security All researchers face the same challenge not only must they identify a suitable method for analysing their research question they must also apply it This volume prepares students and scholars for the key challenges they confront when using social science methods in their own research To bridge the gap between knowing methods and actually employing them the book not only introduces a broad range of interpretive and explanatory methods it also discusses their practical application Contributors reflect on how they have used methods or combinations of methods such as narrative analysis interviews qualitative comparative analysis QCA case studies experiments or participant observation in their own research on non state actors in international security Moreover experts on the relevant methods discuss these applications as well as the merits and limitations of the various methods in use Research on non state actors in international security provides ample challenges and opportunities to probe different methodological approaches It is thus particularly instructive for students and scholars seeking insights on how to best use particular methods for their research projects in International Relations IR security studies and neighbouring disciplines It also offers an innovative laboratory for developing new research techniques and engaging in unconventional combinations of methods This book will be of much interest to students of non state security actors such as private military and security companies research methods security studies and International Relations in general The Open Access version of this book

Security, the Environment and Emancipation Matt McDonald, 2012-01-30 This book offers an examination of the role of emancipation in the study and practice of security focusing on the issue of environmental change. The end of the Cold War created a context in which traditional approaches to security could be systematically questioned. This period also saw a concerted attempt in IR to argue that environmental change constituted a threat to security. This book argues that such a notion is problematic as it suggests that a universal definition of security is possible which prevents a recognition of security as a site of contestation in which a range of actors articulate alternative visions of who or what is in need of being secured. If security is understood and approached in traditional terms as the territorial preservation of the nation state from external threat then it is indeed difficult to see how environmental issues would benefit from being placed on states security agenda. If however security is defined in terms of the emancipation of the most vulnerable individuals from contingent structural oppressions then drawing a relationship between environmental change and security may be beneficial for redressing those environmental issues and prioritising the needs of those most at risk from the manifestations of global environmental change. This book takes the limitations of contemporary approaches to the relationship between the environment and security as its starting point and seeks to do two things. First it aims to illustrate the ways in which arguments over approaches to environmental issues can be viewed as contestation over the meaning of security in particular political contexts. Central here is the composition and assumptions of the dominant security discourse to emerge regarding those issues, a framework of meaning for the most important forms of action on behalf of a particular group, defining the terms for meaningful contestation and negotiation about security itself within that group. As such the book attempts to illustrate the dynamics of competition over the meaning of security with reference to environmental issues, particularly focusing on instances of political change in the dominant security discourse through which that issue is approached. In the process the author points to the central role of these dominant security discourses in underpinning the most practically significant actions regarding environmental issues such as deforestation and global climate change. The book employs methodological tools that enable a focus on how particular frameworks of meaning are constituted and become dominant, how they provide a lens through which various issues are approached and how discourses most consistent with redressing environmental change and the suffering of the most vulnerable might come to provide the framework through which security is viewed in particular contexts. This book will be of much interest to students of Critical Security Studies, geography, sociology, IR and Political Science in general.

Environmental Security in the Anthropocene Judith Nora Hardt, 2017-09-22 This book provides a critical assessment of the theories and practice of environmental security in the context of the Anthropocene. The work analyses the intellectual foundations, the evolution and different interpretations, strengths and

potential of the link between environment and security but also its weaknesses incoherencies and distortions To do so it employs a critical environmental security studies analytical framework and uniquely places this analysis within the context of the Anthropocene Furthermore the book examines the practice theory divide and the political implementation of the environmental security concept in response to global environmental change and in relation to different actors It pays significant attention to the Environment and Security Initiative ENVSEC which is led by different programs of the United Nations the OSCE and until recently by the North Atlantic Treaty Organization NATO among others and has largely been overlooked in the academic literature to date The goal is to study how environmental security practice could inform and shape the environmental security theory and also to explore how conversely new theoretical insights could contribute to the enhancement of environmental security activities This book will be of great interest to students and academic scholars of Environmental Security Critical Security Studies Green Political Theory Global Governance and International Relations in general

The International in Security, Security in the International Pinar Bilgin, 2016-07-15 International Relations continues to come under fire for its relative absence of international perspectives In this exciting new volume Pinar Bilgin encourages readers to consider both why and how non core geocultural sites allow us to think differently about key aspects of global politics Seeking to further debates surrounding thinking beyond the West non West divide this book analyzes how scholarship on and conceptions of the international outside core contexts are tied up with peripheral actors search for security Accordingly Bilgin looks at core periphery dynamics not only in terms of the production of knowledge in the production of IR scholarship or material threats but also peripheral actors conceptions of the international in terms of standard of civilization and their more contemporary guises which she terms as hierarchy in anarchical society The first three chapters provide a critical overview of the limits of our theorizing about IR and security as well as a discussion on the track record of critical approaches to IR and security in addressing those limits The following three chapters offer one way of addressing the limits of our theorizing about IR and security by inquiring into the international in security security in the international Each of these chapters makes a theoretical point and illustrates this further in a spotlight section that further illustrates the point to aid student learning A genuinely innovative contribution to this rapidly emerging field within IR this book is essential reading for students and scholars of critical security international relations theory and Global IR

International Security Studies Peter Hough, Andrew Moran, Bruce Pilbeam, Wendy Stokes, 2015-02-20 This new textbook provides students with a comprehensive and accessible introduction to the subject of security studies with a strong emphasis on the use of case studies In addition to presenting the major theoretical perspectives the book examines a range of important and controversial topics in modern debates covering both traditional military and non military security issues such as proliferation humanitarian intervention food security and environmental security Unlike most standard textbooks the volume also offers a wide range of case studies including chapters on the USA China the Middle East Russia Africa the Arctic

the Middle East Europe and Latin America providing detailed analyses of important global security issues The 34 chapters contain pedagogical features such as textboxes summary points and recommended further reading and are divided into five thematic sections Conceptual and Theoretical Military Security Non Military Security Institutions and Security Case Studies This textbook will be essential reading for all students of security studies and highly recommended for students of critical security studies human security peace and conflict studies foreign policy and International Relations in general
