Industry 4.0 and Digitization Ulrich Hilpert, 2022-06-15 This book includes studies on regions industries and tendencies of industrial change and spatial concentration of competences and industrial potentials The chapters in this volume provide for discussions concerning a wider understanding of situations related to Industry 4.0 and digitization It also reaches out further than towards technology and economy because it includes regional and metropolitan societies workforces and the divergencies of effects and opportunities Industry 4.0 and digitization are new transformations for regions and metropolises where technologies are applied but regionally can appear as a continuation of innovative processes where it is developed The divergent presence of competences creates a selectivity process among regions There are individual industry location nexuses formed out of competences of industries labour force and research which are complemented by public policies providing support towards such adaptation of innovation and change Regional societies formed from skilled and educated labour become an important basis for participation in innovation and supply chains Since smart factories widely can be managed remotely this also shows a concentration of decision making Simultaneously it forms

a polycentric de concentration indicating some more important locations as central within the networks These systematic changes continue to deepen over time While public policies may match innovative opportunities at the appropriate moment they also contribute to a continuation of uneven development and divergent societal tendencies Industry 4.0 and digitization indicate a wide and selective change of organization associated with new technologies and innovation While some regions and metropolises can continue to build both innovative competences and innovative societies based on innovative labour force others will participate because of their position in supply chains The chapters in this book were originally published as a special issue of the journal *European Planning Studies* Code of Federal Regulations ,2010 **HCI in Mobility,**
