Technology Southwest Jiaotong University China Culture Design James D. White, Krista White, 2025-11-11 Strong cultures don't emerge by accident. They're built with clarity, consistency, and design. This is your guide. Today's leaders are navigating a storm of competing demands, rising economic and social pressures, rapid technological disruption, and a workforce that expects greater purpose and accountability than ever before. In this unpredictable climate, a weak culture erodes trust, loyalty, and performance. A strong one, by contrast, makes the difference between clarity and confusion, resilience and fragility. It's time to get intentional about your company's culture. In this practical and inspiring book, you'll find a clear, actionable framework rooted in design thinking and inclusive leadership to help you shape a culture that's resilient, empowering, and built to last. **Culture Design** brings together James D. White's expert perspective, informed by more than thirty years of operating experience across sectors and in the boardroom, with his daughter Krista White's millennial perspective of modern workers' expectations from their company and its culture. This powerful combination produces a masterful joint outlook on what makes leaders best suited to build cultures that work for all. Together, they've written an essential book with one central message: culture design is an indispensable pillar of strategy for organizations to thrive in the coming decades and beyond.

AIR CRASH INVESTIGATIONS, CAPTAIN LOST CONTROL: The Crash of Kenya Airways Flight 507 Hank Williamson, editor, 2012-07-01 During the night of 04th May 2007, the B737-800 registration 5Y-KYA, operated by Kenya Airways as flight KQA 507 from Abidjan International Airport, Côte d'Ivoire, to the Jomo Kenyatta Airport, Nairobi, Kenya, made a scheduled stop over at the Douala International Airport, Cameroon. The weather was stormy. A number of departing planes decided to wait for the weather to improve. Kenya Airways, however, decided to depart. Shortly after take-off at about 1000 ft, the aircraft entered into a slow right roll that increased continuously and eventually ended up in a spiral dive. On the 5th May 2007, at approximately 0008 hrs, the airplane crashed in a mangrove swamp, South-South East of Douala. All 114 people on board were killed, and the airplane was completely destroyed. The airplane crashed after loss of control by the crew as a result of spatial disorientation after a long slow roll during which no instrument scanning was done and in the absence of external visual references in a dark night. *Australian Government Publications*, 1985 **Cumulated Index Medicus**
