It's the perfect book to look back at all you may have missed or to jump start you on a second viewing of the whole series. As an entertainment correspondent, Renfro has covered the show's premieres, broken down key details in scenes, explored characters' histories and interviewed the cast, directors and crew. In this book, she sheds new light on the themes, storylines, character development, the meaning of the finale and what you can expect next. Some of the questions answered here include: What was the Night King's ultimate purpose? How did the show effect George R. R. Martin's ability to finish the book series? Why were the final seasons shorter? Why did the direwolves get shortchanged? How were the fates of Jon Snow and Daenerys Targaryen foretold from the start? Was that really a bittersweet ending? Winter may have come and gone, but there is still plenty to discover and obsess over in this behind-the-scenes fan guide to the Game of Thrones HBO series.

Watching Game of Thrones Martin Barker, Clarissa Smith, Feona Attwood, 2021-03-23 Game of Thrones was an international sensation and has been looked at from many different angles. But to date, there has been little research into its audiences: who they were, how they engaged with and responded to it. This book presents the findings of a major international research project that garnered more than 10,000 responses to an innovative qualitative questionnaire. Among its findings are a new way of understanding the place and role of favourite characters in audiences' responses, new insights into the role of fantasy in encouraging thinking about our own world and an account of two combined emotions, relish and anguish, which structure audiences' reactions to controversial elements in the series.

Concept TV Luca Bandirali, Enrico Terrone, 2021-11-08 What is a television series? A widespread answer takes it to be a totality of episodes and seasons. Luca Bandirali and Enrico Terrone argue against this characterization. In *Concept TV: An Aesthetics of Television Series*, they contend that television series are concepts that manifest themselves through episodes and seasons, just as works of conceptual art can manifest themselves through installations or performances. In this sense, a television series is a conceptual narrative, a principle of construction of similar narratives. While the film viewer directly appreciates a narrative made of images and sounds, the TV viewer relies on images and sounds to grasp the conceptual narrative that they express. Here lies the key difference between television and film. Reflecting on this difference paves the way for an aesthetics of television series that makes room for their alleged prolixity, their tendency to repetition and their lack of narrative closure. Bandirali and Terrone shed light on the specific ways in which television series are evaluated, arguing that some apparent flaws of them are indeed aesthetic merits when considered from a conceptual perspective. Hence, to maximize the aesthetic

value of television series one should not assess them in the same framework in which films are assessed but rather in a distinct conceptual framework
