50 Years of Recuperation of the Situationist International McKenzie Wark, 2012-11-28 From Occupy Wall Street activists and corporate adbusters to online hackers and guerilla street artists the influence of the Situationist International SI is written large across our contemporary cultural landscape. Formed in 1957 as a merger of four European avantgarde groups with backgrounds in Marxism and Lettrism the SI would over the next decade introduce many key intellectual and artistic concepts to us. In *50 Years of Recuperation* critically acclaimed author McKenzie Wark explores how our contemporary understanding of art, politics and even reality itself has been shaped by these original culture jammers.

Freedom of Culture Jorinde Seijdel, 2007 The contemporary public domain, the free space where culture is produced and exchanged is under pressure. The exchange and distribution of cultural products, content in the form of music, image or text is easier in digital society but increasingly hemmed in by corresponding moves towards greater regulation and control: new copyright laws and intellectual property policy. Instead of enjoying a free culture we are watching the emergence of what Lawrence Lessig calls a permission culture. Simultaneously as an aspect of broader privatization and regulation processes private entities are appropriating more and more of public culture and deciding what is made available or publicly accessible. This issue of the Dutch architectural journal *Open* investigates the root causes of these developments, how they interrelate and what the implications are for the free production and practice of culture as well as for the internal dynamics and balance of power in the public domain.

Sensoria McKenzie Wark, 2020-08-18 As we face the compounded crises of late capitalism, environmental catastrophe and technological transformation, who are the thinkers and the ideas who will allow us to understand the world we live in? McKenzie Wark surveys three areas at the cutting edge of current critical thinking: design, environment, technology and introduces us to the thinking of nineteen major writers. Each chapter is a concise account of an individual thinker, providing useful context and connections to the work of the others. The authors include Sianne Ngai, Kodwo Eshun, Lisa Nakamura, Hito Steyerl, Yves Citton, Randy Martin, Jackie Wang, Anna Lowenhaupt Tsing, Achille Mbembe, Deborah Danowich and Eduardo Viveiros de Castro. Eyal Weizman, Cory Doctorow, Benjamin Bratton, Tiziana Terranova, Keller Easterling, Jussi Parikka. Wark argues that we are too often told that expertise is obtained by specialisation. *Sensoria* connects

the themes and arguments across intellectual silos They explore the edges of disciplines to show how we might know the world through the study of culture the different notions of how we create such things and the impact that the machines that we devise have had upon us The book is a vital and timely introduction to the future both as a warning but also as a road map on how we might find our way out of the current crisis
