Man Arguments Scott Aikin,John Casey,2022-02-10 This book analyses the straw man fallacy and its deployment in philosophical reasoning While commonly invoked in both academic dialogue and public discourse it has not until now received the attention it deserves as a rhetorical device Scott Aikin and John Casey propose that straw manning essentially consists in expressing distorted representations of one s critical interlocutor To this end the straw man comprises three dialectical forms and not only the one that is usually suggested the straw man the weak man and the hollow man Moreover they demonstrate that straw manning is unique among fallacies as it has no particular logical form in itself because it is an instance of inappropriate meta argument or argument about arguments They discuss the importance of the onlooking audience to the successful deployment of the straw man reasoning that the existence of an audience complicates the dialectical boundaries of argument Providing a lively provocative and thorough analysis of the straw man fallacy this book will appeal to postgraduates and researchers alike working in a range of fields including fallacies rhetoric argumentation theory and informal logic

The Implications of Evolution for

Metaphysics David H. Gordon, 2023-08-22 After the nineteenth century turn from idealism when idealist philosophies were largely abandoned for materialist ones many analytic philosophers have adhered to scientific naturalism as the new orthodoxy largely due to the success of scientific advancements The New Atheists such as Daniel Dennett and Richard Dawkins claim it is Darwin who deserves much of the credit for repudiating the traditional Mind first world view In *The Implications of Evolution for Metaphysics Theism Idealism and Naturalism* David H Gordon explores questions such as Is it true that evolution is incompatible with theism and necessarily results in naturalism Is it possible as naturalism maintains that everything can be reduced to physical processes Or are there too many recalcitrant phenomena that defy reduction Can the epistemological conditions for metaphysical knowledge be met If the underdetermination of theory allows for multiple metaphysical theories to cover the same phenomena with each offering an epistemically adequate explanation then neither naturalism nor theism can be asserted to be objectively true Nevertheless it is possible to favor one over the other based on overall coherence and explanatory power

A Judeo-Christian Appraisal of Major Theories of Truth Joseph B. Onyango Okello, 2025-05-22 What is truth How should we define it Should we

define it christologically as Jesus did when he revealed himself to Thomas as the embodiment of truth or should we appeal to philosophy for help This book explores possible answers to these questions More specifically the book offers a brief survey of how different philosophical theories have attempted to define truth After finding them somewhat incomplete the book shows how an adequate account of truth is given by the Judeo Christian tradition s view of omniscience By drawing from the rich tradition of the church fathers the book notes how naturalistic views of truth fail to account for the existence of truth prior to the evolution of the human mind This problem however is a non issue for a theistic account of truth and makes a strong case for the existence of objective truth even before the human mind was designed **Professional Judgment for Lawyers**
