Block K+ MW 4:30am-5:45PM – Braker 118
Course Materials Available @Trunk

General Objectives:

- This course is designed for you to think about economics from a macro perspective. The course is mostly based on the microeconomic principles of rationality and optimization, but with several deviations from them considered. We shall examine some basic aspects of an economic system such as:
 - (i) time structure: static versus dynamic
 - (ii) equilibrium structure: partial versus general
 - (iii) trade structure: real versus nominal trade
 - (iv) information structure: symmetric, differential, asymmetric information;
 - (v) risk structure: certainty equivalents, expectations and risk;
 - (vi) asset market structure: complete versus incomplete markets.
- We shall study in some detail capital accumulation, labor markets, asset pricing and the structure of asset markets, monetary policy, and fiscal policy, with attention to the relationship between individual behavior and aggregate outcomes; and macroeconomics and finance interactions.
- As a technical note, this course uses discrete time models only.

Course Requirements:

Mid-Term Exam I: One Hour-15 Min Exam (15%) – Monday, March 3 (~ at part IV of the course)
Mid-Term Exam II: One Hour-15 Min Exam (15%) – Wednesday, April 9 (~ at part V of the course, cumulative)
One Two-Hour Final Exam (40%) – Friday, May 9, 8:30-10:30AM
Short Problem Sets, Readings and Quizzes (10%)
One Term Paper (Topics to be discussed individually) (20%) – Due on Wednesday, April 30.

[Exam and Problem Sets Policy: There are no make-up exams. Problem set is due at a prearranged date; after the deadline, the problem set loses 20% of its value for each late day; problem sets handed in six or more days after the deadline have no value. All grades in this class are curved.]

- I encourage you to work with groups of your fellow colleagues to study and solve problem sets. Group problem sets will be negotiated.

Garnett,2008 A comprehensive survey of the current state and future direction of heterodox economic thought Bridging the Gap Between Growth Theory and Policy in Asia: An Extension of the Solow Growth Model Singh, Rup,2014-03-31 Although economic growth is amongst the oldest of debates in Economics there has been little advancement in growth theory since the classic works of Solow As such clear cut answers to the context specific determinants of growth especially for developing countries are rare Bridging the Gap Between Growth Theory and Policy in Asia An Extension of the Solow Growth Model adds to the works of Solow by showing how his original model can be extended and used for policy discussing issues in growth econometrics including the theoretical underpinnings of growth models and some of the important challenges in empirical studies on economic growth This simpler manual will be highly useful for applied economists policy makers and graduate students *Essays in Economic Theory, Growth, and Labour Markets* George Bitros,Yannis Katsoulacos,2002-01-01 The distinguished contributors in this volume provide a variety of essays which are written in honor of Emmanuel Drandakis These essays fall into four uniform areas of economics economic growth general equilibrium labor economics and game theory and applications The editors focus on a select set of issues that stand high on the agenda of academic research They provide fresh insights and approaches to the analysis of these issues and thus open up wider avenues for our understanding of the dilemmas posed for theory and policy Readers are offered new empirical evidence on such thorny social problems as for example unemployment the intergenerational transmission of human capital and the response of wages to price and endowment changes **News and Notes on the Social Sciences**

,1973 **Principles of Economics in Context** Neva Goodwin,Jonathan Harris,Julie Nelson,Brian Roach,Mariano Torras,2019-08-01 The study of economics should not be highly abstract but closely related to real world events Principles of Economics in Context addresses this challenge laying out the principles of micro and macroeconomics in a manner that is thorough up to date and relevant to students keeping theoretical exposition close to experience Emphasizing writing that is compelling clear and attractive to students it addresses such critical concerns as ecological sustainability distributional equity the quality of employment and the adequacy of living standards Key features include Clear explanation of basic concepts and analytical tools with Discussion Questions at the end of each section encouraging immediate review of what has been read and relating the material to the students own experience Full complement of instructor and student support materials online including test banks and grading through Canvas Key terms highlighted in boldface throughout the text and important ideas and definitions set off from the main text A glossary at the end of the book containing all key terms their

definitions and the number of the chapters in which each was first used and defined Updates for the second edition include Expanded coverage of topics including inequality financialization and debt issues the changing nature of jobs and sustainable development New material on wage discrimination by race and gender an expanded section on labor markets and immigration Updated discussion of fiscal policy to include more recent developments such as the Trump tax cuts New material on behavioral economics public goods and climate change policy a new section on The Economics of Renewable Energy This new affordable edition combines the just released new editions of Microeconomics in Context and Macroeconomics in Context to provide an integrated full year text covering all aspects of both micro and macro analysis and application with many up to date examples and extensive supporting Web resources for instructors and students The companion website can be found at <http://www.bu.edu/eci/education/materials/textbooks/principles-of-economics-in-context>

International Macroeconomic Dynamics Stephen J. Turnovsky, 1997 International Macroeconomic Dynamics provides extensive applications of important macroeconomic dynamic models to the international economy For a long time the study of macroeconomics has focused almost exclusively on a closed economy and downplayed the role of international transactions Today however researchers recognize that one cannot fully understand domestic macroeconomic relationships without considering the global economy within which each country operates Increasingly economists are treating international transactions as an integral part of the macroeconomic system and international macroeconomics has become an area of intensive research activity International Macroeconomic Dynamics provides extensive applications of important macroeconomic dynamic models to the international economy It adopts the main contemporary macroeconomic framework the representative agent model and develops a series of models of increasing complexity The author considers both small and large economies and analyzes them in both deterministic and stochastic contexts The emphasis is very much on the development of the analytical models a novel feature is the extensive use of continuous time stochastic methods While the author applies the models to a range of important policy issues particularly issues of fiscal policy the reader is invited to view the analyses as blueprints for other applications *The Macroeconomics of Corruption* Maksym Ivanyna, Alex Mourmouras, Peter Rangazas, 2021-04-20 This textbook examines corruption through a macroeconomic lens exploring the relationship between corruption fiscal policy and political economy It merges macroeconomic growth models with elements of political economic theory to address important applied topics such as income inequality within and across countries growth slowdowns and fiscal crises Revised and updated to include new research findings and recent policy discussions the second edition contains 15 new sections and 2 new chapters on topics such as public defaults the wage elasticity of work and the interest elasticity of saving and the economic and fiscal impact of the 2020 pandemic Most of the basic ideas are illustrated using a two period model of government investment that captures the future cost of policies that favor the present The more subtle and advanced issues are illustrated and in some cases quantified using the overlapping generations model of

economic growth The models used to illustrate the mechanisms of economic growth are extended to incorporate politics and the behavior of public official The text concludes with a thorough discussion of policy reforms designed to address the issues discussed in earlier chapters Intended for students familiar with intermediate level economics the second edition contains a technical appendix expanded end of chapter questions and problems and a complete solutions manual The second edition also offers updated resources for instructors including sample syllabi and over 550 multiple choice questions Offering a unified explanation for the causes and consequences of government failure fiscal crisis and needed policy reforms this text is appropriate for advanced undergraduate and beginning graduate courses in macroeconomics political economy and public policy Working Paper ,1981 **Dialogues in Arab Politics** Michael N. Barnett,1998 Barnett explores the relationships among Arab identity the meaning of Arabism and desired regional order in the Middle East from 1920 to the present focusing on Egypt Lebanon Syria Jordan Iraq Yemen and Saudi Arabia *The Euro and the Dollar in a Globalized Economy* Pedro Gomis-Porqueras,2016-12-05 The dollar has been the dominant currency of the world economy for almost a century since 2002 the euro has gained widespread international acceptance resulting in important institutional economic and financial changes both for the euro zone the United States and the world economies affecting foreign exchange and financial markets as well as economic activities around the world In years to come the international role of the euro will hinge on the validity of the fundamental idea underlying its creation namely that important components of sovereignty can be pooled and shared among nations in the pursuit of common economic and political objectives This key book assesses the international role of the euro discusses its impact on global financial markets shifting global exchange rate relationships and their implications With input from various disciplines economics business and political science it foments discussions intended to facilitate an exchange of ideas among academics practitioners and the local business community *The Crisis in Economics* Edward Fullbrook,2003-04-03 Charts the impact the PAE Network has had so far and constitutes a manifesto for a different kind of economics it features key contributions from all the major voices in heterodox economics including Tony Lawson Geoff Hodgson and Sheila Dow
