Lecciones de Matemáticas para Abogados 2. 0 Carlos Andrés Naranjo Martínez, Carlos Andrés Naranjo, 2013-05-30

Aproximarse con un método de pensamiento estratégico a los conceptos y a los objetos que son estudio de una ciencia determinada permite visualizar las diferentes posibilidades de argumentación y solución de las situaciones y los problemas que le son propios. En este sentido el estudio de las matemáticas en la carrera de derecho y en particular el estudio del pensamiento estratégico modelado mediante la teoría de juegos clásica ofrece a los estudiantes métodos de pensamiento que propenden por una aproximación moderna e integral al derecho. Por ello Lecciones de Matemáticas para Abogados 2. 0 presenta situaciones que ejemplifican la manera como algunos temas propios de la matemática ayudan al estudio de algunos temas del derecho y en general al análisis y al desarrollo del pensamiento lógico y las competencias argumentativas. As entre otros se abordan temas como probabilidad til para el estudio de situaciones bajo incertidumbre funciones lineales prácticas para analizar contextos de oferta y demanda en el mercado matemáticas financieras necesarias para el estudio de los intereses generados por un capital imprescindible para las discusiones jurídicas referentes a las obligaciones dinerarias. Todos estos tratados bajo la ptica de la teoría de juegos clásica y con la cual se analizan situaciones en ambientes cooperativos y no cooperativos importantes hoy para el análisis de situaciones económicas o políticas que involucren la toma de decisiones de agentes que interactúan de modo racional y que le interesan al derecho. En definitiva se muestra en este trabajo algo innegable el derecho busca regular todas las actividades del hombre y la matemática busca generar modelos que expliquen la realidad. Sin embargo no es lo único en común. Tanto matemáticos como abogados generalmente se dedican a resolver problemas.
