Social, Economic, and Environmental Impacts Between Sustainable Financial Systems and Financial Markets Ziolo, Magdalena, 2019-10-25 Sustainable development is necessary to counteract and mitigate the impact of socially harmful forces in a globalized world. However, sustainable development and its organizations must ensure the effective management of their funds and beneficial financial frameworks in order to best realize their sustainable goals. There is a need for studies that seek to understand how to connect sustainable development and the financial world in order to maximize the economic and environmental wellbeing of the world. *Social Economic and Environmental Impacts Between Sustainable Financial Systems and Financial Markets* is a pivotal reference source that examines the funding and monetary utilization of environmental and socially responsible entities. Featuring research on topics such as green taxes, intergenerational equity, and shadow economy, this book is ideally designed for government officials, policymakers, economists, financial managers, sustainability developers, and academicians seeking current research on the relationship between new sustainable financial phenomena and negative global externalities.

Reforming Economics and Economics Teaching in the Transition Economies Michael Watts, William B. Walstad, 2002-01-01 The volume is of greatest interest to those pursuing issues of the implementation of economics education and its impact at an elementary level on economic understanding and attitudes. Through generally careful statistical analysis, it shows what can be done even in a most difficult environment as well as the constraints on change imposed by Soviet legacies. It is a valuable addition to the literature on economics pedagogy. *Richard E. Ericson, Slavic Review*. Authors from the West and from transition economies describe the major changes in economics content and instruction that occurred in schools and universities throughout nations in Eastern and Central Europe and the former Soviet Union from 1989 to 2000.

and inclusive its interdisciplinary scope covers such varied fields as anthropology communication and media studies criminal justice economics education geography human services management political science psychology and sociology In addition while not a discipline methodology is at the core of these fields and thus receives due and equal consideration At the same time we strive to be comprehensive and broad in scope we recognize a need to be compact accessible and affordable Thus the work is organized in A to Z fashion and kept to a single volume of approximately 600 to 700 pages *The Meaning of Growth* Richard McNeill Douglas,2025-09-30 Since the Limits to Growth report was published in 1972 it has been widely known that a commitment to endless growth was putting us on course for environmental disaster so why have we failed to take decisive political action in the half century since then In *The Meaning of Growth* Richard McNeill Douglas uses interpretive social science to uncover the cultural roots of political resistance to environmental science and policy Through a close reading of anti environmentalist rhetoric the book identifies its idolisation of growth as a defence of a modern Western European world view focusing on values of freedom power and immortality The significance of these findings is drawn out by applying the secularisation thesis a theoretical account of the development of a modern understanding of reality from a theological world view to which it is ostensibly opposed This framework is used to offer a deep interpretation of what is at stake in environmental debate that to accept there are limits to growth means abandoning crucial elements of a faith in a theodicy of progress that makes life meaningful in a secular age Douglas concludes by suggesting that the precondition for political action on the environment is a change of philosophical perspective that provides for a sense of meaning in a world of limits This book should be of interest to academics in the fields of environmental sociology and communications studies as well as activists interested in understanding the motivations of anti environmentalist campaigners and how to counter their influence
