Family Firms in Postwar Britain and Germany David Paulson,2023 Examines the culture and conduct of six small and medium sized enterprises SMEs in England and West Germany from 1945 to the late 1970s drawing on numerous archives in Germany and Britain This is the first book length study that examines the detailed histories of SMEs in a comparative transnational manner Emerging from this study is an evaluation of German and British varieties of capitalism in action showing that they were not fixed or static but rather have changed considerably as they evolved over time The German companies studied formed part of the Mittelstand the family owned sector which is unique to German speaking countries This book explores whether the principles of a close identification with the surrounding region and a patriarchal culture within a family atmosphere were adopted in practice then and whether they are still applicable today Paulson compares the Mittelstand to British SMEs in order to understand how their approach differed from that of their German counterparts For both countries the ecosystem which surrounded businesses is examined paying particular attention to funding and vocational education The book concludes that the potential for a British Mittelstand existed but that British companies were often less well managed and had to operate within a less supportive external environment than that which favoured the Mittelstand Historical lessons learned from the management of these companies still resonate today and can help us to understand contemporary differences in business performance This book will therefore be of interest to scholars and students of twentieth century business and economic history as well as management studies **Catalogue of the New Hampshire**
