reliability of software is becoming increasingly important to a large range of industries that rely on complex computer
systems and machinery with computer control The reliability of a system depends on both the hardware and the software
that comprise the system Although faults in design can continue to give problems the issues and the techniques for meeting
severe reliability requirements in hardware have been understood for some time In the case of software both the techniques
and a positive attitude of software developers to the achievement of reliability are much less well established They are
particularly crucial in the development of software dependent safety critical systems 信頼性工学の発展と展望 (Japan),1997 *IEEE Antennas and Propagation Society International Symposium* ,1992 **The Canadian Parliamentary**
