Toys and Playthings John Newson, Elizabeth Newson, 2017-12-06 John

and Elizabeth Newson were well known for their studies of child rearing which have combined a rigorous research methodology with sympathetic insights into family life and a lively approach to scientific reporting Path breaking brilliant seminal outstanding fascinating enthralling and enchanting are some of the adjectives used by critics to describe their previous books They now turn their attention to toys the pegs on which children hang their play a study for which they are uniquely qualified Not only had they long experience in normal child development they had been actively involved for many years in research and training in remedial play for disabled children their research unit was a major influence in the phenomenal development of the toy libraries self help movement they designed for and advised the toy industry and they had their own family run specialist toyshop With this background it is not surprising that their book on toys and playthings is both informative and entertaining on many different fronts Richly observant it follows the child s development in play from using the mother or father as the first and best toy through the exploratory and manipulative sequences to the use of toys in ritual symbolic or contemplative ways Against this detailed understanding of ordinary children s growth points in play the Newsons and their collaborators examine the special needs of disabled children with a firm emphasis on how parents can help What is more in providing an intensely practical guide for the parents and teachers of the disabled child they draw out comparative insights which are enlightening and absorbing for those whose children do not have such urgent problems Once again the Newsons share with the reader the viewpoints and preoccupations of research workers in the field There is indeed a continual sense of work in progress and nowhere more than in the chapter on using toys for developmental assessment where the reader is given a hot line to a laboratory i e playroom notes used in their own research unit at the time in a welcome move away from the rigid test bound assessment of special children The book is enriched by the authors sharp awareness that the history of playthings has a far longer perspective than the history of child psychology They are not basically interested in educational toys as such but in all the objects made or found on which the child hones his skill his reasoning powers his imagination his emotions or his sense of humour Fairground baubles joke toys and poppy head dolls are as much a part of this book as bricks sorting boxes and teddy bears In the Newsons own words We hope that people who simply like toys as objects will find something in this book to interest them we suspect indeed that liking toys will be what all readers whatever their reason for opening the book have in common

Baudelaire's Media Aesthetics Marit Grønmo, 2016-10-20 Baudelaire's Media Aesthetics situates Charles Baudelaire in the midst of 19th century media culture It offers a thorough study of the role of newspapers photography and precinematic devices in Baudelaire's writings while also discussing the cultural history of these media generally The book reveals that Baudelaire was not merely inspired by the new media but that he played with them using them as frames of perception and ways of experiencing the world His writings demonstrate how different media respond to one another and how the conventions of one medium can be paraphrased in another medium Accordingly Baudelaire's Media Aesthetics argues that Baudelaire should be seen merely as an advocate of pure poetry but as a poet in a media saturated environment It shows that mediation montage and movement are features that are central to Baudelaire's aesthetics and that his modernist aesthetics can be conceived of to a large degree as a media aesthetics Highlighting Baudelaire's interaction with the media of his age Baudelaire's Media Aesthetics discusses the ways in which we respond to new media technology drawing on perspectives from Walter Benjamin and Giorgio Agamben Combining detailed research with contemporary theory the book opens up new perspectives on Baudelaire's writings the figure of the flâneur and modernist aesthetics

Androids and Intelligent Networks in Early Modern Literature and Culture Kevin LaGrandeur, 2013-01-04 Awarded a 2014 Science Fiction and Technoculture Studies Prize Honourable Mention This book explores the creation and use of artificially made humanoid servants and servant networks by fictional and non-fictional scientists of the early modern period Beginning with an investigation of the roots of artificial servants humanoids and automata from earlier times LaGrandeur traces how these literary representations coincide with a surging interest in automata and experimentation and how they blend with the magical science that preceded the empirical era In the instances that this book considers the idea of the artificial factotum is connected with an emotional paradox the joy of self enhancement is counterpoised with the anxiety of self displacement that comes with distribution of agency In this way the older accounts of creating artificial slaves are accounts of modernity in the making a modernity characterized by the project of extending the self and its powers in which the vision of the extended self is fundamentally inseparable from the vision of an attenuated self This book discusses the idea that fictional artificial servants embody at once the ambitions of the scientific wizards who make them and society's perception of the dangers of those ambitions and represent the cultural fears triggered by independent experimental thinkers the type of thinkers from whom our modern cyberneticists descend
