Futurism and early cinema shared a fascination with dynamic movement and speed presenting both as harbingers of an emerging new way of life and new aesthetic criteria And the Futurists quickly latched on to cinema as a device with great potential to manipulate our perceptions in order to create a new world In the edited collection *Futurist Cinema* Rossella Catanese explores that conjunction bringing in avant garde artists and their manifestos to show how painters and other artists turned to cinema as a model for overcoming the inherently static nature of painting in order to rethink it for a new era

Ether and Modernity Jaume Navarro, 2018-08-30 Ether and Modernity offers a snapshot of the status of an epistemic object the ether or aether in the early twentieth century The contributed papers show that the ether was often regarded as one of the objects of modernity hand in hand with the electron radioactivity or X rays and not simply as the stubborn residue of an old fashioned long discarded science The prestige and authority of scientists and popularisers like Oliver Lodge and Arthur Eddington in Britain Phillip Lenard in Germany or Dayton C Miller in the USA was instrumental in the preservation defence or even re emergence of the ether in the 1920s Moreover the consolidation of wireless communications and radio broadcasting indeed a very modern technology brought the ether into audiences that would otherwise never have heard about such an esoteric entity The ether also played a pivotal role among some artists in the early twentieth century the values of modernism found in the complexities and contradictions of modern physics such as wireless action or wave particle puzzles a fertile ground for the development of new artistic languages in literature as much as in the pictorial and performing arts Essays on the intellectual foundations of Umberto Boccioni's art the linguistic techniques of Lodge and Ernst Mach's considerations on aesthetics and physics witness to the imbricate relationship between the ether and modernism Last but not least the ether played a fundamental part in the resurgence of modern spiritualism in the aftermath of the Great War This book examines the complex array of meanings strategies and milieus that enabled the ether to remain an active part in scientific and cultural debates well into the 1930s but not beyond This portrait may be easily regarded as the swan song of an epistemic object that was soon to fade away as shown by Paul Dirac's unsuccessful attempt to resuscitate some kind of aether in 1951 with which this book finishes

Futurist Painting Sculpture (Plastic Dynamism) Umberto Boccioni, 2016-06-01 Futurist Painting Sculpture Plastic Dynamism a truly radical book by Umberto Boccioni 1882-1916 claimed a central position in artistic debates of the 1910s and 1920s exerting a powerful influence on the Italian Futurist movement as well as on the entire European historical avant garde including Dada and Constructivism Today

Boccioni is best known as an artist whose paintings and sculptures are prized for their revolutionary aesthetic by American and European museums. But *Futurist Painting Sculpture* demonstrates that he was also the foremost avant garde theorist of his time. In his distinctive exhilarating prose style Boccioni not only articulates his own ideas about the Italian movement's underpinnings and goals but also systematizes the principles expressed in the vast array of manifestos that the Futurists had already produced. Featuring photographs of fifty one key works and a large selection of manifestos devoted to the visual arts, Boccioni's book established the canon of Italian Futurist art for many years to come. First published in Italian in 1914, *Futurist Painting Sculpture* has never been available in English until now. This edition includes a critical introduction by Maria Elena Versari. Drawing on the extensive Futurist archives at the Getty Research Institute, Versari systematically retraces for the first time the evolution of Boccioni's ideas and arguments, his attitude toward contemporary political, racial, philosophical, and scientific debates, and his polemical view of Futurism's role in the development of modern art.

Filippo Tommaso Marinetti, 2016-04-04
Filippo Tommaso Emilio Marinetti (22 December 1876 – 2 December 1944) was an Italian poet, editor, art theorist, and founder of the Futurist movement. The *Manifesto of Futurism*, written by the Italian poet Filippo Tommaso Marinetti, initiated an artistic philosophy, Futurism, that was a rejection of the past and a celebration of speed, machinery, violence, youth, and industry. It also advocated the modernization and cultural rejuvenation of Italy. Marinetti wrote the manifesto in the autumn of 1908, and it first appeared as a preface to a volume of his poems published in Milan in January 1909. It was published in the Italian newspaper *Gazzetta dell'Emilia* in Bologna on 5 February 1909, then in French as *Manifeste du futurisme*. The *Manifesto of Futurism* appeared in the newspaper *Le Figaro* on 20 February 1909. Translated by Jason Forbus.

Futurist Conditions David Mather, 2020-10-29 Italian futurism visualized diverse types of motion which had been rooted in pervasive kinetic and vehicular forces generated during a period of dramatic modernization in the early 20th century. Yet, as David Mather's sweeping intellectual and art historical scholarship demonstrates, it was the camera, not the engine, that proved to be the primary invention against which many futurist ideas and practices were measured. Overturning several misconceptions about Italian futurism's interest in the disruptive and destructive effects of technology, *Futurist Conditions* provides a refreshing update to the historical narrative by arguing that the formal and conceptual approaches by futurist visual artists reoriented the possibly dehumanizing effects of mechanized imagery toward more humanizing spiritual aims. Through its sustained analysis of the artworks and writings of Umberto Boccioni, Giacomo Balla, and the Bragaglia brothers, dating to the first decade after the movement's founding in 1909, Mather's account of their obsession with kinetic motion pivots around a 1913 debate on the place and relative import of photography among traditional artistic mediums, a debate culminating in the expulsion of the Bragaglias, but one that also prompted a range of productive responses by other futurist artists to world-changing social, political, and economic conditions.

Curious Disciplines Sarah Hayden, 2018-04-15 The transnational modernist Mina Loy 1882 1966 embodied the avant garde in many literary and artistic media This book positions her as a theorist of the avant garde and of what it means to be an artist Foregrounding Loy s critical interrogation of Futurist Dadaist Surrealist and Degenerate artisthood and exploring her poetic legacies today Curious Disciplines reveals Loy s importance in an entirely novel way Examining the primary texts produced by those movements themselves their manifestos magazines pamphlets catalogues and speeches Sarah Hayden uses close readings of Loy s poetry prose polemics and unpublished writings to trace her response to how these movements wrote themselves collectively into being

European Avant-garde Dietrich Scheunemann, 2000 This collection of critical essays is designed to lay the foundations for a new theory of the European avant garde It starts from the assumption that not one all embracing intention of all avant garde movements i e the intention of reintegrating art into the practice of life Peter Bürger but the challenge of new cultural technologies in particular photography and cinema constitutes the main driving force of the formation and further development of the avant garde This approach permits to establish a theoretical framework that takes into account the diversity of artistic aims and directions of the various art movements and encourages a wide and open exploration of the multifaceted and often contradictory nature of the great variety of avant gardist innovations Following the theoretical foundation of the new approach individual contributions concentrate on a diverse range of avant gardist concepts trends and manifestations from cubist painting and the literary work of Apollinaire and Gertrude Stein to the screeching voices of futurism dadaist photomontage and film surrealist photographs and sculptures and neo avant gardist theories as developed by the French group OuLiPo The volume closes with new insights gained from placing the avant garde in the contexts of literary institutions and psychoanalytical and sociological concepts The main body of the volume is based on presentations and discussions of a three day research seminar held at Yale University New Haven in February 2000 The research group formed on this occasion will continue with its efforts to elaborate a new theory of the avant garde in the coming years

International Futurism in Arts and Literature Günter Berghaus, 2012-10-25 This publication offers for the first time an inter disciplinary and comparative perspective on Futurism in a variety of countries and artistic media 20 scholars discuss how the movement shaped the concept of a cultural avant garde and how it influenced the development of modernist art and literature around the world
