Loop-mediated Isothermal Amplification (LAMP) - Review and Classification of Methods for Sequence-specific Detection Lisa Becherer,Nadine Borst,Mohammed Bakheit,Sieghard Frischmann,Roland Zengerle,Felix von Stetten,2020
Abstract In the course of the last 20 years isothermal nucleic acid amplification tests have emerged as an important diagnostic tool not only for clinical applications but also for food quality control and environmental monitoring Loop mediated isothermal amplification LAMP is well known for its robust and highly sensitive and specific amplification of target DNA which is achieved by utilizing up to six primers Moreover LAMP excels through its isothermal and energy efficient amplification requirements rendering it a prime candidate for low cost diagnostics and analysis at the point of need Recently methods for sequence specific detection have gained more importance because unlike sequence independent detection methods they are highly specific towards the target DNA In the last 13 years a variety of sequence specific methods have emerged based on a very diverse range of sensing techniques including optical magnetic piezoelectric electrochemical and magnetoresistive sensing To give structure to the diverse multitude of sequence specific methods we created a systematic classification and provide a critical comparative evaluation according to a catalogue of criteria analytical performance multiplexing quantification and instrumental requirements Fluorescence based detection making up half of the methods can be processed on open platforms and satisfies all the criteria listed before Instrumental requirements are discussed in terms of complexity portability and fluidic cartridges In addition the technological readiness level and the kind of platform open versus method tailored are evaluated the latter playing an important role in the miniaturization and automation of operational process steps We also observe an increase in the use of smartphone integrated sensors to improve LAMP based point of need testing In summary recent developments in methods for the sequence specific detection of LAMP demonstrate high potential for many future applications

Seed-Borne Diseases of Agricultural Crops: Detection, Diagnosis & Management Ravindra Kumar,Anuja Gupta,2020-05-18 The global population is increasing rapidly and feeding the ever increasing population poses a serious challenge for agriculturalists around the world Seed is a basic and critical input in agriculture to ensure global food security Roughly 90 percent of the crops grown all over the world are propagated by seed However seed can also harbour and spread pathogens e g fungi bacteria nematodes viruses etc which cause devastating diseases Seed borne pathogens represent a major threat to crop establishment and yield Hence timely detection and

diagnosis is a prerequisite for their effective management The book *Seed Borne Diseases of Agricultural Crops Detection Diagnosis Management* addresses key issues related to seed borne transmitted diseases in various agricultural crops Divided into 30 chapters it offers a comprehensive compilation of papers concerning the history of seed pathology importance of seed borne diseases seed borne diseases and quarantine seed health testing and certification detection and diagnosis of seed borne diseases and their phytopathogens host parasite interactions during development of seed borne diseases diversity of seed borne pathogens seed borne diseases in major agricultural crops non parasitic seed disorders mechanisms of seed transmission and seed infection storage fungi and mycotoxins impact of seed borne diseases on human and animal health and management options for seed borne diseases We wish to thank all of the eminent researchers who contributed valuable chapters to our book which will be immensely useful for students researchers academics and all those involved in various agro industries

Escherichia coli Marjanca Starčič Erjavec,2023-03-01 This book illuminates the various aspects of *Escherichia coli* including its pathotypes virulence factors and antimicrobial resistance It also presents new insights into the scientometric analysis of the E coli knowledge landscape novel molecular diagnostic platforms novel antimicrobial agents and E coli based DNA amplification expression technology for the automatic assembly of concatemeric open reading frames and proteins

Current Topics in Giardiasis Alfonso J. Rodriguez-Morales,2017-12-13 Giardiasis is still a significant infectious and parasitic disease caused by the protozoan *Giardia intestinalis* There are estimates of more than 200 million cases of giardiasis occurred in the world annually The advance in research in giardiasis during the last century and particularly during the last decade is considerable Nevertheless many challenges still are ahead in order to reach a higher control of this disease This book tried to update the significant epidemiological and clinical research in many aspects with a multinational perspective This book with 9 chapters has been organized in 3 major sections 1 Overview Epidemiology and Clinical Aspects 2 Biological and Diagnostic Aspects and 3 Treatment Prevention and Public Health

Diagnostic Molecular Biology Chang-Hui Shen,2023-06-29 *Diagnostic Molecular Biology* Second Edition describes the fundamentals of molecular biology in a clear concise manner with each technique explained within its conceptual framework and current applications of clinical laboratory techniques comprehensively covered This targeted approach covers the principles of molecular biology including basic knowledge of nucleic acids proteins and chromosomes the basic techniques and instrumentations commonly used in the field of molecular biology including detailed procedures and explanations and the applications of the principles and techniques currently employed in the clinical laboratory Topics such as whole exome sequencing whole genome sequencing RNA seq and ChIP seq round out the discussion Fully updated this new edition adds recent advances in the detection of respiratory virus infections in humans like influenza RSV hAdV hRV but also corona This book expands the discussion on NGS application and its role in future precision medicine Provides explanations on how techniques are used to diagnosis at the molecular level Explains how to use information technology to communicate and assess results in the lab Enhances our

understanding of fundamental molecular biology and places techniques in context Places protocols into context with practical applications Includes extra chapters on respiratory viruses Corona Development of Loop-mediated Isothermal Amplification of DNA (LAMP) for Bovine Haemorrhagic Septicaemia Caused by Pasteurella Multocida B:2 [With CD Copy],2014 **Digital Loop-Mediated Isothermal DNA Amplification** Janay Elise Kong,2017 Nucleic acid amplification has applications in diagnostics sequencing genetic fingerprinting among others Currently nucleic acid amplification is treated as the gold standard method for several diagnostics however because of the multi step protocols and the large equipment these assays are lengthy and require laboratory settings Digital nucleic acid amplifications assays developed have greatly improved several aspects of nucleic acid amplification by creating a more robust and sensitive assay This is due to the reduction in background noise and the ability to effectively concentrate target analytes in nano or picoliter volumes by compartmentalization of these samples We were able to demonstrate a 69 fold fluorescence change in an isothermal nucleic acid amplification assay with a 60% increase in fluorescence stability with elevated temperatures over the time course of the reaction with the use of a unique dye combination of EvaGreen and hydroxynaphthol blue HNB Due to the improvements in signal we were able to demonstrate comparable results using a mobile phone based fluorescence plate reader as with that of a benchtop reader The unique dye combination was then applied to a digital system demonstrating signal improvements that are crucial to developing a robust assay giving a higher efficiency percentage of on wells closer to the theoretical value and a larger difference in fluorescence intensities for on versus off wells Lastly we examined the mechanism of the dye combination to best determine additional ways of improving the signal generation By sequestering EvaGreen HNB allows amplification to proceed without interference Additionally a Förster resonance energy transfer FRET interaction between the dye molecules when DNA is absent from the solution acts to lower the background fluorescence such that a greater fluorescence fold change occurs with DNA amplification The EvaGreen and HNB have a highly tuned binding affinity such that prior to DNA amplification they have FRET interactions and afterwards in the presence of large amounts of DNA EvaGreen binding to DNA becomes more favorable All of these developed technologies and methods work in conjunction to improve upon currently developed techniques for nucleic acid amplification in point of care settings *Food Preservation and Safety of Natural Products* Helen N. Onyeaka,Ozioma F. Nwabor,2022-06-15 Food Preservation and Safety of Natural Products addresses the most common causes of food spoilage that create significant loss to global food production while also discussing how food serves as a vehicle for the transmission of pathogenic microorganisms responsible for mild to debilitating health conditions in humans The book provides essential information for food safety professionals on issues relating to foodborne diseases and offers potential solutions by presenting various methods of incorporating natural products in food production to prevent the spread of foodborne pathogenic organisms The demand for green consumerism and consumers general distaste for synthetic food additives poses a serious challenge to food safety and preservation Natural products are used as green and sustainable

source of bioactive compounds that can be applied in various fields including food The use of plant and other natural products in food preservation is on the rise hence this book reviews microbial mediated food spoilage foodborne pathogens and food contamination and offers applications of natural products in food preservation Provides important information on microbial metabolic by products natural enzymatic processes to prevent food spoilage or deterioration Includes molecular techniques for antimicrobial and antioxidant applications in food food packaging and edible films Presents the latest evidence based science on the natural products used as additives in food
