Theory and Performance of Electrical Machines J. B. Gupta, 1976 Theory & Performance Of Electrical Machines J. B. Gupta, 2009 **Electrical and Mechanical Technology (For Universities of Andhra Pradesh)** Pilla Ramana/ Mary, Kralapudy Alice/ Jajimoggala Sarojini & Shabana, This book is designed for under graduate students of all branches those who are going to study Electrical and Mechanical Technology as one of the subject in their curriculum The primary goal of this book is to establish a firm understanding of basic knowledge on DC Machines Single Phase Transformers Three Phase Induction Motors Alternators Measuring Instruments Energy Sources Internal Combustion Engines Heat transfer Power transmission and Manufacturing methods The contents of this book are presented in a simple way for easy understanding and can be used as self study material **Basic Electrical Engineering** Dr. Ramana Pilla, Dr. M Surya Kalavathi & Dr. G T Chandra Sekhar, 2022-01-03 This book is designed based on revised syllabus of JNTU Hyderabad AICTE model curriculum for under graduate B Tech BE students of all branches those who study Basic Electrical Engineering as one of the subject in their curriculum The primary goal of this book is to establish a firm understanding of the basic laws of Electric Circuits Network Theorems Resonance Three phase circuits Transformers Electrical Machines and Electrical Installation Theory and Performance of Electrical Machines , 1976 **Bulletin of the Institution of Engineers (India).** Institution of Engineers (India), 1973 **Theory and Performance of Electrical Machines** J. B. Gupta, 2007 **International Conference on Mechanism Science and Control Engineering (MSCE 2014)** , 2014-09-02 The aim of MSCE 2014 is to provide a platform for researchers engineers and academicians as well as industrial professionals to present their research results and development activities in mechanism science and control engineering It provides opportunities for the delegates to exchange new ideas and application experiences to establish business or research relations and to find global partners for future collaboration MSCE2014 is conducted to all the researchers engineers industrial professionals and academicians who are broadly welcomed to present their latest research results academic developments or theory practice Topics of interest include but are not limited to Mechanism theory and Application Mechanical control and Automation Engineering Mechanical Dynamics Materials Processing and Control Instruments and Vibration Control It is of great pleasure to see the delegates exchanging ideas and establishing sound relationships on the conference Energy Processing and Smart Grid James A. Momoh, 2018-07-18 The first book in the field to incorporate fundamentals of energy systems and their applications to smart grid along with advanced topics in modeling and control This book provides an overview of how multiple sources and loads are connected via power electronic devices Issues of storage technologies are discussed and a comparison summary is given to facilitate the design and selection of storage types The need for real time measurement and controls are pertinent in future grid and this book dedicates several chapters to real time measurements such as PMU smart meters communication scheme and protocol and standards for processing and controls of energy options Organized into nine sections Energy

Processing for the Smart Grid gives an introduction to the energy processing concepts topics needed by students in electrical engineering or non electrical engineering who need to work in areas of future grid development It covers such modern topics as renewable energy storage technologies inverter and converter power electronics and metering and control for microgrid systems In addition this text Provides the interface between the classical machines courses with current trends in energy processing and smart grid Details an understanding of three phase networks which is needed to determine voltages currents and power from source to sink under different load models and network configurations Introduces different energy sources including renewable and non renewable energy resources with appropriate modeling characteristics and performance measures Covers the conversion and processing of these resources to meet different DC and AC load requirements Provides an overview and a case study of how multiple sources and loads are connected via power electronic devices Benefits most policy makers students and manufacturing and practicing engineers given the new trends in energy revolution and the desire to reduce carbon output Energy Processing for the Smart Grid is a helpful text for undergraduates and first year graduate students in a typical engineering program who have already taken network analysis and electromagnetic courses
