Laramie, Garrett Jones, 2011 *Population and Politics* John Gerring, Wouter Veenendaal, 2020-05-28 Analyzes scale effects across a range of political dimensions encompassing different political levels using a multi method approach [A General Theory of Institutional Change](#) Shiping Tang, 2017-07-05 Institutional change is a central driving force behind social changes and thus a central topic in all major fields of social sciences Yet no general theory of institutional change exists Drawing from a diverse literature this book develops a general theory of institutional change based on a social evolutionary synthesis of the conflict approach and the harmony approach The book argues that because the whole process of institutional change can be understood as a process of selecting a few ideas and turning them into institutions competition of ideas and struggle for power to make rules are often at the heart of institutional change The general theory not only integrates more specific theories and insights on institutional change that have been scattered in different fields into a coherent general theory but also provides fundamental new insights and points to new directions for future research This book makes a fundamental contribution to all major fields of social sciences sociology sociological theory political sciences institutional economics and political theory It should be of general interest to scholars and students in all major fields of social science **Long-Run Growth Forecasting** Stefan Bergheim, 2008-03-29 This book explores how to set up an empirical model that helps with forecasting long term economic growth GDP forecasts for the years 2006 to 2020 for 40 countries are derived in a transparent way Offering a systematic approach to models of potential GDP that can also be used for forecasts of more than a decade it fills the wide gap between the high demand for such models by banks international organizations and governments

on the one hand and the limited supply on the other hand Frequent forecast failures in the past e g Japan 1990 Asia 1997 and the heavy economic losses they produced motivated the work The book assesses the large number of theories of economic growth the drivers of economic growth the available datasets and the empirical methods on offer A preference is shown for evolutionary models and an augmented Kaldor model The book uses non stationary panel techniques to find pair wise cointegration among GDP per capita and its main correlates Economic Prehistory Gregory K.
