Rethinking Western Approaches to Counterinsurgency Russell W. Glenn, 2015-05-22 This book critically examines the Western approach to counter insurgency in the post colonial era and offers a series of recommendations to address current shortfalls The author argues that current approaches to countering insurgency rely too heavily on conflicts from the post World War II years of waning colonialism Campaigns conducted over half a century ago Malaya Aden and Kenya among them remain primary sources on which the United States British Australian and other militaries build their guidance for dealing with insurgent threats this though both the character of those threats and the conflict environment are significantly different than was the case in those earlier years This book addresses the resulting inconsistencies by offering insights analysis and recommendations drawn from campaigns more applicable to counter insurgency today Eight post colonial conflicts to include Northern Ireland Sierra Leone Colombia and Iraq provide the basis for analysis All are examples in which counterinsurgents attained or continue to demonstrate considerable progress when taking on enterprises better known for disaster and disappointment Recommendations resulting from these analyses challenge entrenched beliefs to serve as the impetus for essential change Rethinking Western Approaches to Counterinsurgency will be of much interest to students of counter insurgencies military and strategic studies security studies and IR in general

The Best Knowledge of Project Management Ram Babu Sao, 2025-11-14 This book The Best Knowledge of Project Management is intended for the best way to Project Planning and Review work Project management is all about change Think about the scope of changes personnel changes and budget changes that are all part of the job The best project managers find a way to stay on top of change not just within individual projects but across the span of a career

With that in mind we put out a call asking veteran project managers for their thoughts on how project management has changed over the past several decades Project management methodology began to take form with the advent of the Critical Path Method CPM and the Program Evaluation and Review Technique PERT The Critical Path Method CPM was developed by Dupont CPM is a technique used to predict project duration by analysing which sequence of activities has the least amount of scheduling flexibility It was designed to address the complex process of shutting down chemical plants for maintenance and maintenance The PERT is a method for analysing the tasks involved in completing a project especially the time needed to complete each task and identifying the minimum time needed to complete the total project Project management was largely based on Waterfall techniques This was good enough to land men on the moon and bring them home safely But the world has only become more complex and we've seen project management techniques adapt to those changes over time The American Association of Cost Engineers invented the Program Evaluation Review Technique PERT first for the U S Navy's Polaris Project The Gantt Chart Developed by Henry Gantt in 1917 One of the forefathers of project management Henry Gantt is best known for creating his self named scheduling diagram the Gantt chart In the 1950s project management methodology began to take form with the advent of the Critical Path Method CPM for the Polaris missile project and the U S Navy's development of the Program Evaluation and Review Technique PERT The American Association of Cost Engineers invented the Total Cost Management Framework Early practitioners of project management and the associated specialties of planning and scheduling cost estimating cost and schedule control formed the AACE in 1956 Total cost management is a process for applying the skills and knowledge of cost engineering It is also the first integrated process or method of portfolio programmed and project management The United States Department of Defense created the WBS concept as part of the Polaris mobile submarine launched ballistic missile project The Economist, 1922 Handbook of Risk Theory Sabine Roeser, 2012 Risk has become one of the main topics in fields as diverse as engineering medicine and economics and it is also studied by social scientists psychologists and legal scholars But the topic of risk also leads to more fundamental questions such as What is risk What can decision theory contribute to the analysis of risk What does the human perception of risk mean for society How should we judge whether a risk is morally acceptable or not Over the last couple of decades questions like these have attracted interest from philosophers and other scholars into risk theory This handbook provides for an overview into key topics in a major new field of research It addresses a wide range of topics ranging from decision theory risk perception to ethics and social implications of risk and it also addresses specific case studies It aims to promote communication and information among all those who are interested in theoretical issues concerning risk and uncertainty This handbook brings together internationally leading philosophers and scholars from other disciplines who work on risk theory The contributions are accessibly written and highly relevant to issues that are studied by risk scholars We hope that the Handbook of Risk Theory will be a helpful starting point for all risk scholars who are interested in broadening and deepening

their current perspectives *Routledge Handbook of Risk Studies* Adam Burgess,Alberto Alemanno,Jens Zinn,2016-03-31 It is over 40 years since we began to reflect upon risk in a more social than technological and economic fashion firstly making sense of the gap between expert and public assessment of risks such as to our health and environment With fixed certainties of the past eroded and the technological leaps of big data ours is truly an age of risk uncertainty and probability from Google s algorithms to the daily management of personal lifestyle risks Academic reflection and research has kept pace with these dizzying developments but remains an intellectually fragmented field shaped by professional imperatives and disciplinary boundaries from risk analysis to regulation and social research This is the first attempt to draw together and define risk studies through a definitive collection written by the leading scholars in the field It will be an indispensable resource for the many scholars students and professionals engaging with risk but lacking a resource to draw it all together *Urban Transport in the Developing World* Harry T. Dimitriou,Ralph Gakenheimer,2011-01-01 Policy making for urban transport and planning of economies in the developing world present major challenges for countries facing rapid urbanisation and rampant motorisation alongside growing commitments to sustainability These challenges include coping with financial deficits providing for the poor dealing meaningfully with global warming and energy shortages addressing traffic congestion and related land use issues adopting green technologies and adjusting equitably to the impacts of globalisation This book presents a contemporary analysis of these challenges and new workable responses to the urban transport problems they spawn **The Mind and Method of the Economist** Brian J. Loasby,1989 This major book comprises amongst other essays critical appraisals of major economists including Alfred Marshall Joan Robinson G B Richardson W J Baumol Frank Hahn and Herbert Simon and of Austrian economics and diverse approaches to co ordination failure in macroeconomics *Germany, Europe, and the Politics of Constraint* Kenneth Dyson,Klaus Goetz,2003-10-16 These essays examine the Europeanization of the political system of the Federal Republic of Germany across the polity politics and public policy dimensions The book s 17 chapters focus on three key themes the challenge to the power of Germany to determine the course of the integrationist project and to shape European public policies the increasing constraints in the domestic political arena associated with Europeanization and domestic contestation over both the constitutive politics of the EU and specific policy choices This volume is essential reading for students of comparative European politics and German studies **Management and Change in Africa** Terence Jackson,2004-07-31 Arising from a research project funded by Danish International Development Assistance Management and Change in Africa includes results of management surveys across 15 sub Saharan countries and of organizational surveys taken across a range of sectors in South Africa Kenya Nigeria and Cameroon It combines methodology theory and case examples to explore thoroughly the influences on management in Africa and attempts to push the boundaries of cross cultural theory In doing so it explores how much can be learned from studying both the successes and failures of African management towards realizing the potential of an African Renaissance and what the global community
