Regional Studies Halil İbrahim Aydın, Magdalena Ziolo, Aniela Bălăcescu, 2017-04-14 The phenomenon of globalization can be described as a gradual increase in the process and dependency level that combines people, society and countries from different economic, social and political aspects of the world. Development, which is a multidimensional concept such as globalization, is a concept that includes human values as well as economic, social, cultural, demographic and political dimensions. With the globalization process, a turn to use knowledge as a factor of production has been passed and investing in people who use knowledge in production has become important. Investment in human capital leads to the importance of development concept. anyone keen on understanding Asia's dynamic and changing scene Global Childhoods Stuart Aitken, 2013-09-13 This astute book initiates a broad discussion from a variety of different disciplines about how we place children nationally globally and within development discourses Unlike other books of its kind it does not seek to dwell solely on the abiding complexities of local comparisons Rather it elaborates larger concerns about the changing nature of childhood young people's experiences their citizenship and the embodiment of their political identities as they are embedded in the processes of national development and globalization In particular this book concentrates on three main issues nation building and developing children child participation and activism in the context of development and globalization and children's lives in the context of what has been called the end of development These are relatively broad research perspectives that find focus in what the authors term reproducing and developing children as a key issue of national and global concern They further argue that understanding children and reproduction is key to understanding globalization **Multidisciplinary Journal of Research Development**, 2006 *Globalization and Economic Development* Servaas Storm, C. W. M. Naastepad, 2001 Globalization is widely regarded as a means not only of ensuring efficiency and growth but also of achieving equity and development for those countries operating in the global economy The book argues that this perception of globalization as the road to development has lost its lustre The experience of the 1990s belied expectation of the gains such as faster growth and reduced poverty which could be achieved through closer integration in the world economy The authors demonstrate that the downside of globalization for developing countries has proved to be far greater than is generally accepted Based on empirical facts and sound economic reasoning they arrive at a non-conventional interpretation of the impact of globalisation on the development process of poor countries and propose policy alternatives to the standard Washington consensus On the external front they find that developing countries need to actively manage their integration into the global economy if they are to overcome the imbalances and instabilities associated with international flows of goods and capital and be capable of pursuing broad-based and equitable economic development Domestically they show that such development can often be achieved by deviating from rather than adhering to the Washington consensus fiscal and other policy norms The distinguished group of contributors have produced a provocative book which is a substantial contribution to the debate on globalization It will appeal to development economists in particular and economists in general who like to question contemporary economic reasoning
