Methods of Clinical Epidemiology Suhail A. R. Doi, Gail M. Williams, 2013-06-01 Methods of Clinical Epidemiology serves as a text on methods useful to clinical researchers It provides a clear introduction to the common research methodology specific to clinical research for both students and researchers This book sets out to fill the gap left by texts that concentrate on public health epidemiology and focuses on what is not covered well in such texts The four sections cover methods that have not previously been brought together in one text and serves as a second level textbook of clinical epidemiology methodology This book will be of use to postgraduate students in clinical epidemiology as well as clinical researchers at the start of their careers Up from Clinical Epidemiology & EBM O. S. Miettinen, 2011-03-23 Clinical epidemiology is now widely promoted and taught as a basic science of Evidence Based Medicine of clinical EBM to be specific This book however is mostly about that which Miettinen takes to be the necessary substitute for this now so fashionable subject namely Theory of Clinical Medicine together with its subordinate Theory of Clinical Research The leit motif in all of this is Miettinen's perception of the need and opportunity to bring major improvements into clinical medicine in this Information Age now that theoretical progress has made feasible the development of practice guiding Expert Systems for it Parts of this text constitute essential reading for whoever is expected or otherwise inclined to study or teach clinical epidemiology and the same is true of those who set policy for the education of future clinicians but practically all of it is essential reading for future and current academics in the various disciplines of clinical medicine After all the text is the result of a concentrated effort over a half century no less to really understand both clinical and community medicine and the research to advance the knowledge base of these Research epidemiologists too will find this text interesting and instructive
