

Authority Bias

We are more likely to trust and be influenced by ideas that come from authority figures

"Our CEO says the state might tax disposable cups". "Hey, I told you that last week and you said it would never happen!"

Confirmation Bias

This occurs when we warp data to fit or support our existing beliefs or expectations

"What the human being is best at doing is interpreting all new information so that their prior conclusions remain intact."

Sunk Cost Bias

We are often influenced by past, sunk costs, which continue to distort our decisions

"I have already spent so much time and money on this project, so I might as well keep going"

Halo Effect

Our overall impression of a person influences how we feel and think about his or her character

"I think she's too nice to be a good commander in chief"

Availability Cascade

An idea accumulates more credibility as it spreads

"I've heard from a bunch of people that he's going to raise taxes, there must be some truth to it"

Dunning-Kruger Effect

The less you know, the more confident you are

"Our CEO says the state might tax disposable cups". "Hey, I told you that last week and you said it would never happen!"

Declinism

We romanticize the past and believe that society and institutions are in decline

"The latest Supreme Court decision is just another example of how our country is falling apart these days"

Framing Effect

We draw different conclusions based on how an idea is presented to us

Doctor A: "You have an 80 percent chance of a full recovery."
Doctor B: "There's a 20% chance that you'll die after being treated"

Bandwagon Effect

Conforming to a widely held world view in order to fit in and minimize conflict

"All my friends and colleagues are buying that new cryptocurrency. The price keeps on rising, I must buy it"

False Consensus

Overestimating the proportion of people who agree with an idea

"I think that the majority of people agree that this policy makes sense. Everyone I know thinks so"

Cognitive Bias In Military Decision Making And The:

Cognitive Biases in Military Decision Making Michael J. Janser, Army War College (U.S.). Senior Service College Fellowship Program, Center for Strategic and International Studies (Washington, D.C.), 2007 This paper examines the applicability of recent findings from behavioral economics to military decision making Army manuals concerning the Military Decision Making Process mention general biases in decision making but do not mention specific biases or specific mechanisms for mitigating bias Recent research has shed light on specific biases to include overconfidence insensitivity to sample size availability illusory correlation retrievability of instances escalation break even snake bite fear of regret and the confirmation bias The Military Decision Making Process has a long and distinguished record of success However there are also examples of military failures due to cognitive bias These failures include Lee at Gettysburg and McClellan in Virginia Private industry and some elements of the Army have started to account for these deficiencies through various practices including coaching and training This paper concludes that the Military Decision Making Process as described in FM 5-0 is deficient in not fully recognizing and accounting for cognitive biases The process can be improved through several steps These steps include not only research education and training but also procedural and organizational changes **The**

Decision Dilemma--cognitive Bias William P. Stormer, Army War College (U.S.), 1991 Military decision making at the national level is a formidable task The environment is ambiguous and constantly changing Intelligence systems as good as they are will never provide perfect information The stakes involved range from the loss of thousands of lives to the sovereignty of the nation Faced with this difficult task the military decision maker often has to rely on intuitive processes to arrive at a final decision One of the magnificent qualities of human beings is the ability to integrate a vast array of factors weighing on a situation and come up with a viable solution This process involves a great degree of intuitive judgment While there are many examples of great military decisions made substantially on the basis of intuition there is also a down side to this phenomenon Research has shown that there are cognitive biases which can adversely affect the decision making process This paper provides an analysis of these biases and offers practical suggestions on how to reduce their effects

Susceptibilities of the Tourism Industry. The Effect of Terrorism on commercial Surf Tourism Esteban Hack,2018-11-22 Bachelor Thesis from the year 2016 in the subject Tourism Miscellaneous grade 2 1 University of Plymouth Cornwall College Newquay in partnership with UoP course Marine Sports Science BSc Hons language English abstract The tourism industry has significant repercussions in regards to economic value to destinations worldwide but is susceptible to external shocks such as terrorism as tourist numbers follow terroristic activity causing economic damage to destinations beyond managerial control Surf tourism is of growing economic social and environmental value to destinations in Indonesia due to the region s abundance of high quality waves and resulting attractiveness to surfers however it is a region frequented by terrorist activity The aim of this paper is to investigate the effect of terrorism on commercial surf tourism as a sub segment of the global tourism industry Data was obtained using a survey consisting of 5 closed ended questions assessing IAO variables of traveling surfers regarding the perception of terrorism as a risk influencing destination choice and travel plans 42 usable responses were collected over a three month period from January 7th to March 28th 2016 Results of the statistical analysis suggest that surfers demonstrate a different behaviour in comparison to other tourists and have a low perception of terrorism as a risk influencing destination choice In fact from the data and statistical analysis it appears that the significant reliance on the quality of waves at a destination outweighs the risk of terrorism as an influence on destination choice therefore accepting the tested hypothesis which stated that surf tourists do not perceive terrorism as a high risk influencing destination choice or travel plans Suggestions for future research include a replication of this study using a larger sample size and changes to the design of the questionnaire in order to improve upon limitations and further investigate conspicuous findings of this study as well as potential links to the field of behavioural psychology **Ohio State Journal of Criminal Law** ,2014
