Activity-Based Costing for Marketing and Manufacturing Ronald Lewis,1993-05-30 The declining domination of American manufacturers in world class markets has resulted in widespread criticism of traditional costing methods Activity based accounting for manufacturing costs emerged in the 1980s to satisfy the changes taking place in production methods and techniques such as Just in Time Inventory Control and Flexible Manufacturing Systems Although activity based costing methods may be new in manufacturing processes they have been advocated and applied by marketing managers since the late 1960s according to Professor Lewis The accounting profession has finally recognized the advantages of activity based concepts and methods for both marketing and manufacturing functions This book shows how activity based methods and other cost analysis and control techniques may be used by manufacturing and marketing managers Part I explains the cost concepts and terminology used in modern businesses and describes the concept of a fully integrated manufacturing and costing system In world class competition the costing systems must serve the total needs of management not just financial reporting requirements Costing systems must be flexible and multi purpose which is both possible and practical with state of the art computers and software Part II summarizes the traditional cost accounting systems describing job costing and standard costing systems The allocation of costs becomes more important with technological advances A full chapter is devoted to the methods of allocation and the changes required to satisfy advanced manufacturing and activity based costing techniques Part III illustrates activity based costing for manufacturing activity based costing for marketing and an activity based approach to the behavior of costs as well as explaining the traditional factors of variability Part IV describes the techniques that are necessary for analysis and control of costs by management To be well informed managers must know the fundamentals of break even analysis relevant costing capital budgeting ROI and transfer pricing The book makes these techniques easy to understand and to apply to real life situations It is particularly appropriate for manufacturing managers involved in operations and for all marketing managers **CIMA Official Learning System Performance Operations**
