High Throughput Satellites Hector Fenech, 2021-03-31 This exciting new book discusses the motivation for the evolution of a new breed of High Throughput Satellites HTS that have emerged from traditional communications satellites It explores the commercial sectors and technical context that have shaped HTS The historical underpinnings of HTS are provided to highlight the requirements that dimension these satellites A survey of operational GEO HTS systems is also included Readers will understand the technical operational and commercial context of HTS systems as well as the performance of the current HTS system This initial breed of satellites was limited to geostationary satellites but it is quickly projecting into low earth orbit LEO constellations often referred to as mega constellations The industrial and operational facets of LEO constellations are challenging The characteristics of GEO and LEO systems are presented to understand the differences between the two systems The book also explores the evolution of the current HTS payload architectures as well as theoretical methodology is presented for the capacity estimation for both the FORWARD link and RETURN link which can be used for preliminary HTS dimensioning and can be adapted to practical scenarios

French Defence Policy Since the End of the Cold War Alice Pannier, Olivier Schmitt, 2020-12-27 This book describes the evolution of French defence policy since the end of the Cold War For the past thirty years there have been significant changes to French defence policy as a result of several contextual evolutions Changes include shifts in the global balance of power new understandings of the notion of international security economic downturns and developments in European integration Yet despite these changes the purpose of France's grand strategy and its main principles have remained remarkably stable over time This book identifies the incentives representations and objectives of French defence policy The authors examine the general mechanisms that influence policy change and military transformation in democracies the importance of status seeking in international relations the processes of strategy making by a middle power and the dilemmas and challenges of security cooperation By doing so the book raises a number of questions related to the ways states adjust or not their security policies in a transformed international system This book makes French language sources available to non French speaking readers and contributes to a better understanding of a country that is at the forefront of Europe's external action This book will be of great interest to students of defence studies French politics military studies security studies and IR in general

Military Spending and Global Security Jordi Calvo Rufanges, 2020-11-25 Global military expenditure reached an estimated 1 822 billion in 2018 and this book questions what that spending responds to and indeed what that entails in terms of global security The book draws from prior knowledge and research on military expenditure but introduces an all encompassing in depth and original analysis of military spending as a key and often overlooked factor of global instability delving into the present and future consequences of its perpetual growth as well as confronting the reasoning behind it The authors argue that increasing military expenditure is not the best response to the emergencies militarization itself has helped create They

assert that militarization is paradoxically both a cause of and a response to the grave challenges our society is facing The book explains why people are not well served by nation states when they continuously seek to out compete one another in the size and destructive powers of their militaries It discusses the scope of military spending around the world while explaining how militarism is linked with conflict and security threats and how military spending further prevents us from adequately dealing with global environmental problems like climate change A must read for scholars researchers and students from a wide range of disciplines It will also find an audience among professionals from the third sector and activists working on issues related to peace security and militarism as well as social and climate justice

The Economics of Defense

Industry Thomas-Durell Young,2023-10-17 This book on the economics of defence industry assesses a series of historical and contemporary case studies that consistently demonstrate the need for governments to recognise and thereafter factor the financial needs of a narrow industrial sector that is capital intensive technologically advanced and that requires a highly skilled labour force Since the end of the cold war Western governments have systematically reduced financial support to their domestic defence industry and have seemingly ignored planning and funding industrial mobilisation In all cases government policy has been to encourage industries to consolidate capacity to become financially viable in a sector that has seen diminished demand The 2022 Russian invasion of Ukraine has caused Western governments to reassess their previous assumptions Efforts to increase industrial capacity have been met with the iron laws of economics whereby businesses need to show return on investments The chapters in this volume posit that efforts to rationalise industrial capacity and innovation to meet short term financial efficiencies inevitably results in limited expensive and long delays in increased production in times of international crisis This book serves as an essential guide for academics researchers and students interested in defence economics industrial economics international relations and industrial policy The chapters in this book were originally published in various issues of Defense Security Analysis

Asylum for Sale Siobhán McGuirk,Adrienne Pine,2020-11-01

This explosive new volume brings together a lively cast of academics activists journalists artists and people directly impacted by asylum regimes to explain how current practices of asylum align with the neoliberal moment and to present their transformative visions for alternative systems and processes Through essays artworks photographs infographics and illustrations Asylum for Sale Profit and Protest in the Migration Industry regards the global asylum regime as an industry characterized by profit making activity brokers who facilitate border crossings for a fee contractors and firms that erect walls fences and watchtowers while lobbying governments for bigger security budgets corporations running private detention centers and managing deportations private lawyers charging exorbitant fees expert witnesses and NGO staff establishing careers while placing asylum seekers into new regimes of monitored vulnerability Asylum for Sale challenges readers to move beyond questions of legal moral and humanitarian obligations that dominate popular debates regarding asylum seekers Digging deeper the authors focus on processes and actors often overlooked in mainstream analyses and on the trends

increasingly rendering asylum available only to people with financial and cultural capital Probing every aspect of the asylum process from crossings to aftermaths the book provides an in depth exploration of complex international networks policies and norms that impact people seeking asylum around the world In highlighting protest as well as profit Asylum for Sale presents both critical analyses and proposed solutions for resisting and reshaping current and emerging immigration norms

Strategic Management During a Pandemic Vikas Kumar,Gaurav Gupta,2021-08-26 The COVID 19 pandemic changed world dynamics working scenarios as well as professional and emotional dimensions The virus has emerged as a significant threat for the continuity of business Keeping the gravity of the problem in mind companies must understand the need for change and must now update their strategy to account for pandemics The next pandemic may be more severe than the current one meaning that organizations need to devise mechanisms and business models to fight with these situations and maintain business continuity They should not only look forward to saving plants machinery and infrastructure but also concentrate on employee welfare customer engagement and satisfaction during this crisis time The book will not only present the evidence of various effective solutions to run a business in the time of a pandemic but also put forward the new models and practices of business being followed by people at the time of crisis It aims to create a bridge between existing business models and proposed business solutions focusing on existing theories and most importantly case studies from recent happenings This rich collection of chapters will provide insights regarding the business challenges opportunities and practices during pandemic situations like COVID 19 making it particularly valuable to researchers academics and students in the fields of strategic management leadership and disaster management Emergence of Quantum Computing

L'image de l'autonomie des organismes vivants. La capacité croissante des systèmes autonomes à laborer une forme de pensée artificielle amène des réflexions éthiques sur la vie sociale et la perspective du mouvement transhumaniste. Le présent ouvrage répondra notamment aux questions concrètes : Qu'est-ce qu'un système autonome ? Quelles sont les briques technologiques communes et propres à chaque vecteur ? Quels sont les défis technologiques propres à chaque vecteur ? Quels sont les cas d'usages ? Le droit positif est-il adapté pour appréhender les systèmes autonomes ? Quelles sont les conditions de mise sur le marché d'un système autonome ? Quelle est la réglementation applicable aux systèmes autonomes terrestres, aériens maritimes ? Quels sont les usages des robots militaires ? L'preuve du droit international et dans le cadre et hors des conflits armés.

The Law of Unmanned Aircraft Systems Benjamyn I. Scott, 2022-07-12 Aerospace Law and Policy Series Volume 11 In recent years few industries have grown so prodigiously as that of unmanned aircraft systems UAS and as a result developments in national regional and international law and policy are being initiated and implemented This new edition of the definitive survey and guide first published in 2016 reflects the expansion of this sector and the importance placed on it by a diverse range of stakeholders as well as the enlarged regulatory and policy landscape In addition to updating many of the original chapters the second edition covers new topics and moves away from a purely introductory book to a more detailed and critical compendium Authorship has also been extended beyond the original scope of contributors which originally centred around those affiliated with Leiden University's Institute of Air and Space Law and now includes additional experts from all around the world each of whom explores both already existing rules and proposals coming from national regional and international levels As well as broadened discussions on such fundamental legal issues as insurance financing liability accidents investigation privacy cyber security stakeholder organisations and industry standards the second edition takes into account major recent developments in such areas as the following applicability and relevance of international regulatory instruments coming into force of the European Union UAS related laws evolution of different States national law public safety e.g. design production operation and maintenance development of unmanned traffic management systems commercial operations including urban air mobility e.g. flying taxis cargo delivery high altitude activities and developments in defence and security e.g. dual use counter UAS industry to combat illegal use As in the first edition a representative cross section of national laws is included covering twenty one different jurisdictions This fully updated edition not only synthesises and clarifies the complex body of international regional and national UAS related law but also provides expert insight into trends and areas of concern for numerous stakeholders Without a doubt it will be of immeasurable value to lawyers relevant governmental and non governmental agencies aviation law scholars and strategic planners in the wider aviation and transport industries **Les Cahiers français**, 2017

Tableaux de l'économie française Institut National de la Statistique et des Études Économiques, 2017 Les Tableaux de

l'conomie française s'adressent tous ceux qui souhaitent disposer d'un aperçu rapide et actuel sur la situation économique, démographique et sociale de la France. L'ouvrage se compose de 88 fiches organisées autour de cinq grands thèmes : territoire, population, emploi, revenus, conditions de vie, société, économie, finances et système productif. Chacune de ces fiches propose au lecteur des commentaires, des tableaux et des graphiques des définitions et une liste de publications de référence sur le sujet développé. Elles fournissent des informations récentes sur la France et des données permettant de la situer par rapport d'autres pays de l'Union européenne ou du monde. L'édition 2017 propose une nouvelle fiche consacrée aux indicateurs de richesse nationale.
