The Hive Mind at Work Siobhan McHale, 2024-09-03 Learn a new model for understanding how organizations really operate and implement changes that get real results With so many forces of change buffeting the business world today a scary state of flux has replaced any sense of certainty stability and familiarity delivering a wake up call to make crucial changes happen make them happen quickly and make them stick Traditional approaches to change management fall into one of two categories Organizations function like machines where managers pull change levers to fix problems with an engineer's mindset IQ Or People form social networks wherein individual influencers make change happen by developing effective interpersonal relationships EQ Neither of these models offer a full picture to what really happens in an organization In this groundbreaking new book change expert Siobhan McHale offers a third option organizations are complex ecosystems that require a Hive Mind or Group Intelligence GQ to bring about meaningful and lasting change We can learn a lot of lessons from how bees operate Hard work An individual bee spends its entire 40 day life span gathering food for the hive Teamwork Inside each teeming beehive an entire community works collectively to achieve shared goals Role clarity Every bee has a specific job with the queen drones and worker bees faithfully playing their part Resilience Bees can overcome daunting challenges including all the parasites pathogens pesticides and climate fluctuations from Maine to Miami and beyond See how a hive mindset solves many of the common problems all businesses struggle with today

Procuring Complex Performance Nigel Caldwell, Mickey Howard, 2010-09-13 This book examines the management of Procuring Complex Performance PCP in large scale programmes that includes the downstream support phase in sectors such as construction healthcare transport

aerospace marine and defence It brings together a series of edited chapters to explain why the traditional combination of linear project management and highly detailed contracts are now unsuited to the dynamics of emerging customer requirements based on performance and outcome Working with leading business professors across the UK and Europe Caldwell and Howard present the case for why large scale programmes of world class organizations often represent a shifting frontier between the boundaries of public private provision and silos of operations expertise Adopting a procurement perspective the authors explain how complex performance means not just coping with the dynamics of buyer supplier relationships but incorporates the shift from production orientation towards availability of bundled services such as maintenance and upgrade delivered over extended often multi decade timeframes The strength of PCP is its empirical case based support for new business models based on through life management availability contracting and service support which challenge simplistic notions of dyadic hierarchical relationships and transfer of risk to the supply base This unique publication is essential reading for scholars and practitioners seeking to understand the context of innovation and supply as a coordinated and integrated approach to managing and procuring complex performance **Perspective On Holistic**

Engineering Management, A: Learning, Adapting And Creating Value Robert J Aslett, John M Acken, Siva K Yerramilli, 2021-02-02 Today a prosperous technology company can be disrupted and put out of business in a blink of an eye The development of many different technologies that once took years can be done in months or weeks There are also few examples where the engineering work is completely contained in one company or one engineering organization Business strategies have evolved The analysis of competitive forces in an industry has matured to include the concepts of disruptive innovation and coopetition In an ecosystem characterized by rapid changes in technology and how it is developed an engineering R D organization will quickly become irrelevant if it fails to keep the pace of innovation needed to succeed This book provides readers with a holistic approach to engineering management We have seen that successful managers create a strong foundation of a common culture that enables learning value creation diversity and inclusion They create organizations that tightly connect the core engineering functions of strategic planning research and development and are able to comprehend and direct a broader R D system that stretches well beyond their own organization s boundary Doing all of this to extract the greatest value in the least amount of time is what we call holistic engineering management The content for this book is based on over 105 years of combined experience working in a rapidly changing industry In most chapters practical examples and case studies of the concepts provided are given As noted in the foreword by Pat Gelsinger CEO VMWare and in comments from other technology leaders Aart de Geus Chairman and co CEO Synopsys Inc Aicha Evans CEO Zoox Inc William M Holt former Executive VP GM Intel Corp and Amir Faintuch Senior VP GM GlobalFoundries Inc this book will be valuable for students of engineering management and current engineering managers **Practices of Futurecasting** Michael Shamiyeh, 2024-11-18 What do designers scientists entrepreneurs and politicians have in common They all want to shape the

Aviation Week & Space Technology, 2005 *Jane's International Defense Review*, 2006-07 **F & S Index United States Annual**, 2007 *Learning from a Drastic Failure* Isabel Dörfler, Oliver Baumann, 2014 How do organizations learn from a drastic failure We distinguish between ad hoc and systematic reactions and discuss their effectiveness for dealing with two basic challenges 1 identifying and solving the problems that caused the failure and 2 changing the organization accordingly We apply this conceptual perspective to illustrate the dynamics of learning from the drastic failure that occurred during the development of the Airbus A380 superjumbo Our findings echo extant observations that efforts to redesign organizational behavior in an ad hoc manner are often insufficient Instead the organizational system must provide a scaffolding that allows experiencing a critical event in a rich and systematic manner When seen from a dynamic perspective however we find that even imperfect ad hoc efforts may play a vital role By enforcing changes providing

stability and raising awareness they can act as a helpful prelude to more systematic problem solving and change Crash course Peter W. Merlin,NASA History Program Office,2013-05-01 **Harnessing the Power of Failure** John Steven Newman,Stephen M.
