increasing the number of intermediate clients consistent with its chosen positioning The non aviation related section by contrast focuses on how best in class airports have been developing new powers of attraction to customers in their regions well beyond the simple concept of airport retailing by use of the so called commercial airport model Finally the impact of September 11th is shown in terms of increased security measures and the future of the aviation industry as a whole An analysis of worldwide airport industry is provided in the final chapter Airport Marketing is essential reading for airport managers government agencies airlines consultants contributors advisors and sub contractors to this industry as well as both undergraduate and graduate level aviation students
