Alex J Bellamy Of The Stanley Foundation:

Rethinking Humanitarian Intervention Alex J. Bellamy, Stephen McLoughlin, 2018-03-09 Two leading experts in the field re-examine the traditional understanding of humanitarian intervention in this major new text. The recent high profile interventions in Iraq, Libya and Syria show the various international responses to impending or ongoing humanitarian crises, tracking the development from ad hoc military interventions to a more formalised international human rights regime. This evolution has fundamentally changed the way that states and international society think about and respond to atrocities. This textbook charts and explains the transformation, examines the challenges that confront it and asks whether this new politics can withstand the growing crises in international politics. The human protection system is not perfect but attempts to reduce both the incidence and lethality of atrocity crimes. The authors argue that armed intervention alone is rarely sufficient to halt humanitarian atrocities but must be understood within the wider context of peacemaking including non-violent action. The requirement for states to intervene is codified in international law and this raises important practical, political and moral questions for consistent humanitarian action. Based on the authors' two decades of research, this text is the ideal companion for students of International Relations taking modules on Humanitarian Intervention and the Responsibility to Protect at undergraduate and postgraduate levels.

The Oxford Handbook of the Responsibility to Protect Alex J.

Bellamy, Timothy Dunne, 2016 The Responsibility to Protect (R2P) is intended to provide an effective framework for responding to crimes of genocide, ethnic cleansing, war crimes and crimes against humanity. It is a response to the many conscious shocking cases where atrocities on the worst scale have occurred even during the post-1945 period when the United Nations was built to save us all from the scourge of genocide. The R2P concept accords to sovereign states and international institutions a responsibility to assist peoples who are at risk or experiencing the worst atrocities. R2P maintains that collective action should be taken by members of the United Nations to prevent or halt such gross violations of basic human rights. This Handbook, containing contributions from leading theorists and practitioners including former foreign ministers and special advisors, examines the progress that has been made in the last 10 years; it also looks forward to likely developments in the next decade.

Last Lectures on the Prevention and Intervention of Genocide Samuel

Totten, 2017-09-29 *Last Lectures on the Prevention and Intervention of Genocide* is a collection of hypothetical last lectures by some of the top scholars and practitioners across the globe in the fields of human rights and genocide studies. Each lecture purportedly constitutes the last thing the author will ever say about the prevention and intervention of genocide. The contributions to this volume are thought-provoking, engaging and at times controversial, reflecting the scholars' most advanced thinking about issues of human rights and genocide. This book will be of great interest to professors, researchers and students of political science, international relations, psychology, sociology, history, human rights and genocide studies.

Children and the Responsibility to Protect, 2019-06-03 In *Children and the Responsibility to Protect* Bina D Costa and

The Structural Prevention of Mass Atrocities Stephen McLoughlin, 2014-07-17 This book offers a different approach to the structural prevention of mass atrocities It investigates the conditions that enable vulnerable countries to prevent the perpetration of such violence Structural prevention is commonly framed as the identifying and ameliorating of the root causes of violent conflict a process which typically involves international actors determining what these root causes are and what the best courses of action are to deal with them This overlooks why mass atrocities do not occur in countries that contain the presence of root causes In fact very little research has been conducted on what the causes of peace and stability are particularly in relatively countries located in regions marred by civil war and mass atrocities To better understand how such vulnerable countries prevent the commission of mass atrocities this book proposes an analytical framework which enables not only an understanding of risk which arises from the presence of root causes but also of the factors that build resilience in countries and consequently mitigate and manage such risk Using this framework three countries Botswana Zambia and Tanzania are analysed to account for their long term stability despite their location in neighbourhoods characterised by decades of civil war ethnic repression and mass atrocities This work is a significant contribution to the field of genocide studies and crimes against humanity and will be of interest to students and scholars alike *Reconstructing Atrocity Prevention* Sheri P. Rosenberg, Tibi Galis, Alex Zucker, 2016 This proposes a new framework for atrocity prevention featuring scholars from around the globe including three former UN special advisers

The UN Security Council Members' Responsibility to Protect Andreas S. Kolb, 2017-12-04 This book examines the hard legal core if any of the Responsibility to Protect R2P concept with regard to the commitment to take collective action through the UN Security Council It addresses the question of whether public international law establishes a duty on the part of the individual Security Council members to collectively take the necessary action to prevent atrocities genocide crimes against humanity war crimes and ethnic cleansing To this end it offers an interpretation of provisions in multilateral conventions such as the undertaking to prevent genocide in Article 1 of the Genocide Convention and the undertaking to ensure respect for the Geneva Conventions in common Article 1 of the 1949

Geneva Conventions analyses the UN Charter framework for Security Council action and explores whether the recognition of the international responsibility to protect has prompted the emergence of a new norm for general international law

Implementing the Responsibility to Protect Cecilia Jacob, Martin Mennecke, 2019-09-09 This book examines core thematic approaches to the Responsibility to Protect R2P and analyzes case studies regarding the implementation of this important global norm The volume analyzes this process at international regional and local levels and identifies an urgent need to progress from conceptual debates towards implementation in practice in order to understand how to operationalize the preventive dimension of the R2P It argues that R2P implementation necessarily entails the efforts of actors across governance levels and that it is more effective when integrated into existing sites of practice aimed at strengthening human rights and accountability for populations in atrocity risk situations The book addresses R2P implementation in the context of agendas such as resilience gender development cooperation human rights transitional justice peacekeeping and civil military relations It details progress and challenges for implementation in the United Nations regionally in Africa Europe and Southeast Asia and through national atrocity prevention architectures The volume provides readers with a breadth of understanding in terms of both the development and current status of the R2P norm and practical tools for advancing its implementation This book will be of much interest to students of the Responsibility to Protect Human Rights Peace Studies and International Relations in general

The Alternatives to War James Pattison, 2018-06-04 If states are not to go to war what should they do instead In *The Alternatives to War* James Pattison considers the case for the alternatives to military action to address mass atrocities and aggression The volume examines the normative issues raised by measures ranging from comprehensive economic sanctions diplomacy and positive incentives to criminal prosecutions nonviolent resistance accepting refugees and arming rebels For instance given the indiscriminateness of many sanctions regimes are sanctions any better than war Should states avoid megaphone diplomacy and adopt more subtle measures What if anything can nonviolent methods such as civilian defence and civilian peacekeeping do in the face of a ruthless opponent Is it a serious concern that positive incentives can appear to reward aggressors Overall Pattison provides a comprehensive account of the ethics of the alternatives to war In doing so he argues that the case for war is weaker and the case for many of the alternatives is stronger than commonly thought The upshot is that when reacting to mass atrocities and aggression states are generally required to pursue the alternatives to war rather than military action The volume concludes that this has significant implications for pacifism just war theory and the responsibility to protect doctrine

Handbook of Africa's International Relations Tim Murithi, 2013-09-05 Africa's international relations have often been defined and oriented by the dominant international and geopolitical agendas of the day This new volume in the Routledge International Handbooks series examines the impact of globalization and contemporary international political changes including the development of the African Union on Africa's international relations This timely book will engage with and analyse a wide range of issues with chapters written by experts

on a variety of themes **Ideology and Mass Killing** Jonathan Leader Maynard, 2022-05-26 In research on mass killings such as genocides and campaigns of state terror the role of ideology is hotly debated For some scholars ideologies are crucial in providing the extremist goals and hatreds that motivate ideologically committed people to kill But many other scholars are sceptical contending that perpetrators of mass killing rarely seem ideologically committed and that rational self interest or powerful forms of social pressure are more important drivers of violence than ideology In *Ideology and Mass Killing* Jonathan Leader Maynard challenges both these prevailing views advancing an alternative neo ideological perspective which systematically retheorises the key ideological foundations of large scale violence against civilians Integrating cutting edge research from multiple disciplines including political science political psychology history and sociology *Ideology and Mass Killing* demonstrates that ideological justifications vitally shape such violence in ways that go beyond deep ideological commitment Most disturbingly of all the key ideological foundations of mass killings are found to lie not in extraordinary political goals or hatreds but in radicalised versions of those conventional widely accepted ideas that underpin the politics of security in ordinary societies across the world This study then substantiates this account by a detailed examination of four contrasting cases of mass killing Stalinist Repression in the Soviet Union between 1930 and 1938 the Allied Bombing Campaign against Germany and Japan in World War II from 1940 to 1945 mass atrocities in the Guatemalan Civil War between 1978 and 1983 and the Rwandan Genocide in 1994 This represents the first volume to offer a dedicated comparative theory of ideology s role in mass killing while also developing a powerful new account of how ideology affects violence and politics more generally *The Thin Justice of International Law* Steven R. Ratner, 2015-01-15 In a world full of armed conflict and human misery global justice remains one of the most compelling missions of our time Understanding the promises and limitations of global justice demands a careful appreciation of international law the web of binding norms and institutions that help govern the behaviour of states and other global actors This book provides a new interdisciplinary approach to global justice one that integrates the work and insights of international law and contemporary ethics It asks whether the core norms of international law are just appraising them according to a standard of global justice derived from the fundamental values of peace and the protection of human rights Through a combination of a careful explanation of the legal norms and philosophical argument Ratner concludes that many international law norms meet such a standard of justice even as distinct areas of injustice remain within the law and the verdict is still out on others Among the subjects covered in the book are the rules on the use of force self determination sovereign equality the decision making procedures of key international organizations the territorial scope of human rights obligations including humanitarian intervention and key areas of international economic law Ultimately the book shows how an understanding of international law s moral foundations will enrich the global justice debate while exposing the ethical consequences of different rules **A Troubled Sleep** James Waller, 2021 Drawing on ethnographic fieldwork comparative research and over 110 hours of face to face

interviews with a diverse range of political academic civil society and community actors across Northern Ireland Waller revisits one of the world's most deeply divided societies to analyze Northern Ireland's current vulnerabilities and points of resilience as an allegedly post conflict society

Confronting Evil James Waller, 2016-05-27 While it is true that genocide prevention is not what tends to land on the front pages of national newspapers today it is what prevents the worst headlines from ever being made Despite the post Holocaust consensus that Never Again would the world allow civilians to be victims of genocide the reality is closer to Again and Again As many as 170 million civilians across the world were victims of genocide and mass atrocity in the 20th century Now that we have entered the 21st century little light has been brought to that darkness as civilians still find themselves under brutal attack in South Sudan Burma Syria the Central African Republic Burundi Iraq and a score of other countries in the world beset by state fragility and extremist identity politics Drawing on over two decades of primary research and scholarship from a wide range of disciplinary perspectives *Confronting Evil Engaging Our Responsibility to Prevent Genocide* is grounded in the belief that preventing mass atrocity is an achievable goal but only if we have the collective will to do so This groundbreaking book from one of the foremost leaders in the field presents a fascinating continuum of research informed strategies to prevent genocide from ever taking place to prevent further atrocities once genocide is occurring and to prevent future atrocities once a society has begun to rebuild after genocide With remarkable insight Dr James Waller challenges each of us to accept our responsibilities as global citizens in whichever role and place we find ourselves and to think critically about one of the world's most pressing human rights issues in which there are no sidelines only sides

Hypocrisy and Human Rights Kate Cronin-Furman, 2022-11-15 *Hypocrisy and Human Rights* examines what human rights pressure does when it does not work Repressive states with absolutely no intention of complying with their human rights obligations often change course dramatically in response to international pressure They create toothless commissions permit but then obstruct international observers visits and pass showpiece legislation while simultaneously bolstering their repressive capacity Covering debates over transitional justice in Sri Lanka Myanmar Cambodia Democratic Republic of the Congo and other countries Kate Cronin Furman investigates the diverse ways in which repressive states respond to calls for justice from human rights advocates UN officials and Western governments who add their voices to the victims of mass atrocities to demand accountability She argues that although international pressure cannot elicit compliance in the absence of domestic motivations to comply the complexity of the international system means that there are multiple audiences for both human rights behavior and advocacy and that pressure can produce valuable results through indirect paths

Prioritizing Global Responsibilities Luke Glanville, James Pattison, 2024-06-24 States face multiple ongoing and emerging challenges from climate change to global disease mass atrocities to forced displacement humanitarian crises to entrenched global poverty and are constrained by material and political limits to the amount of resources that they can devote to these issues How should states decide which issues to

prioritize and which crises to address Prioritizing Global Responsibilities answers this question by proposing a two level account of just prioritization that aims to be both philosophically sound and practically relevant The authors assess several potential prioritization principles including diversification culpability urgency disadvantage and national interest and argue that states should prioritize issues where they can assist most effectively and where they can help those who are most underprivileged

Responding to Mass Atrocities in Africa Raymond Kwun-Sun Lau, 2021-12-14 This book explores the relationship between the Responsibility to Protect R2P and the International Criminal Court ICC challenging the assumption that they are always mutually reinforcing or complementary and examining instead the many tensions which arise between the immediate imperative of saving lives and the more long term prospect of punishing perpetrators and preventing future conflicts through deterrence Around the world audiences in the mid 1990s watched the mass atrocities unfolding in Rwanda and Srebrenica in horror and disbelief Emerging from these disasters came an international commitment to safeguard and protect vulnerable communities as laid out in the R2P principle and an international responsibility to punish perpetrators with the establishment of the ICC The book provides context independent proposals for resolving contradictions between the two principles suggesting that focusing on timing and sequencing in invoking international R2P and ICC actions could facilitate the easing of tensions Drawing on examples from Uganda Kenya and Darfur the book applies International Relations concepts and theories in order to deepen our understanding of international responses to mass atrocities Ultimately the book concludes that a Protection First Justice Later sequence approach is necessary for managing the tension and facilitating more effective and consistent international responses This book makes an important contribution to discussions and debates surrounding international responses to genocide and mass atrocities It will be of special interest to scholars students and policymakers in International Relations Global Governance African Studies International Development Human Rights and International Criminal Law

Humanitarianism, War, and Politics Peter J. Hoffman, Thomas G. Weiss, 2017-06-27 What is humanitarianism This authoritative book provides a comprehensive analysis of the original idea and its evolution exploring its triangulation with war and politics Peter J Hoffman and Thomas G Weiss trace the origins of humanitarianism its social movement and the institutions international humanitarian law and organizations providers of assistance and protection that comprise it They consider the international humanitarian system s ability to regulate the conduct of war to improve the wellbeing of its victims and to prosecute war criminals Probing the profound changes in the culture and capacities that underpin the sector and alter the meaning of humanitarianism they assess the reinventions that constitute revolutions in humanitarian affairs The book begins with traditions and perspectives ranging from classic international relations approaches to Critical Humanitarian Studies and reviews seminal wartime emergencies and the creation and development of humanitarian agencies in the late nineteenth and twentieth centuries The authors then examine the rise of new humanitarianisms after the Cold War s end and contemporary cases after 9 11 The authors continue by

unpacking the most recent revolutions the International Criminal Court and the Responsibility to Protect as well as such core challenges as displacement camps infectious diseases eco refugees and marketization They conclude by evaluating the contemporary system and the prospects for further transformations identifying scholarly puzzles and the acute operational problems faced by practitioners *Deadly Voyages* Steven W. Bender, Veronica Fynn Bruey, 2019-12-16 *Deadly Voyages* Migrant Journeys across the Globe explores the burdens and impact of perilous migration while considering which laws policies practices and venues might establish empathy and protection for migrants This interdisciplinary volume envisions and calls for a transformation in migration policy motivated by the common goal of drastically reducing the peril migrants face when compelled to make their treacherous journeys All contributors to this volume agree on the inadequacy of current approaches and the dire need for change in global migration law and policy Therefore the book seeks to inform educate persuade and facilitate newer or less heard perspectives toward wider participation and influence within the forced migration policy debate Guided by the famous advice of Karl Marx that the point should be changing the world rather than merely analyzing or interpreting it the contributors suggest practical measures to fix the current gap in responses to migrant peril along with strategies for diagnosing countering and promoting human dignity and social justice with the aim of preventing future deaths and injuries in migrant journeys across the globe Contemporary Security Studies Alan Collins, 2025
