Perspectives in Agricultural Geography: The field of agricultural geography Noor Mohammad, 1981

MIGRATION OF SUGARCANE HARVESTERS

Dr. Shivaji Madhavrao More, 2025-03-15 1 1 Introduction Agriculture is one of the oldest and most important occupations of man. It is generally understood to mean both the cultivation of plants and the raising of livestock. Hence the origin of agriculture goes back to the beginning of domestication of plants and animals. Although man, plants and animals have always lived together and have remained inseparably interconnected with each other, man started domestication of plants and animals. Several scholars of different disciplines, especially from anthropology, archeology, biology, history, paleo botany, genetics, ethnology and other branches of physical sciences, have made efforts to unravel this mystery but have not reached a common conclusion as yet. They hold different views regarding the time and space origin of agriculture.

Characterization of Cropping System Based on Land Utilization to Aid Critically Indexing in Land Holding Pattern in Bilaspur District (C.G.) Subir Kumar Moyra, Dr. (Mrs) Kajal Moitra, Bilaspur District. Dhankakathora is situated in the central part of Chhattisgarh State in India. At present like many other districts of India, the agricultural land holding pattern is under serious pressure due to fragmentation of holding. Such a fact ultimately causes a shrink in average holding size. Parallel to this fact, the cropping intensity in the area has also generally gone down in the previous years. Primarily, this study aims to explore the level of criticality in land holding pattern of the Bilaspur District on the basis of criticality index. A rank was given to each tehsil depending on their CI value. For this, the study incorporated the changing status of land holding pattern from the perspective of land holding and cropping intensity.

Agro Service Centres and Dynamic Progress in Agriculture Dr. Arjun Wagh, 2017-06-30 India is the agrarian country. Agriculture is the main occupation. In ancient times when the study of geography started, man was totally unknown about his surroundings. Study of geography is connected with the arrangement of all things on the surface of the earth. Geographers found many things and geographical phenomena and their characteristics of different places on the earth. The geographer made analysis of thoughts and observations of the geographical elements. Geography is considered as a description of the earth's surface and exploration of it gradually emerged as a discipline of the earth's surface dealing with non-active relationships. Land is a resource capital of the country. Agriculture is the backbone of the Indian economy. Seventy percent of the population is engaged in the
