Alignment, 2010 Agile Strategy Management in the Digital Age David Wiraeus, James Creelman, 2018-08-11 In a world of rapid and unpredictable change the problem with strategic planning is that if you follow your plan through to the end you will get exactly what you used to want What you need is a framework for planning and implementing a strategy that is agile enough to adapt to a dynamic environment but focused enough to deliver That framework is the Dynamic Balanced Scorecard The original Balanced Scorecard system has proven the most popular successful and enduring framework for strategy execution over the last 25 years Comprising a Strategy Map and a scorecard of KPIs targets and initiatives the framework helped organizations distil a strategy into actionable components and measure progress towards a strategic vision while also implementing and monitoring the actions that drove change However for all its success the Balanced Scorecard system now needs to evolve for the digital age Until now building the system rolling it out enterprise wide and adapting it to external changes has been a lengthy process While the fundamental principles of the system are still sound and relevant it needs to become nimbler and more responsive The book provides a step by step guide to agile strategy management from formulation to implementation to learning and adapting For each of the steps the book explains how Dynamic Balanced Scorecards fit for the digital age are built and deployed

Dynamic Supply Chains ePub John Gattorna,2013-07-25 John Gattorna is one of the most original thinkers in the fast changing arena of supply chain management He has pioneered the idea of dynamic alignmentwhich is so powerfully presented in this ground breaking book Martin Christopher Professor of Marketing Logistics Cranfield School of Management Supply chains are at the heart of competitive advantage in business today If supply chains are managed successfully companies will be able to deliver their products and services to customers in a smart cost effective way The key to successful supply chain management is recognising that it s people who really drive the living supply chains that are at the heart of businesses Supply chains are powered by the energy and expertise of employees and suppliers and by the changing wants and needs of customers John Gattorna calls this principle of matching changing customer needs and desires with different supply chain strategies dynamic alignment To secure space in a new market to grow or keep existing markets companies have to get their products out there faster They need to be the first with new products and services and the first to match them with particular customer groups The dynamic alignment model gives a structured way of linking customer expectations to the operational side of business while maintaining the flexibility to systematically modify fulfilment processes as customers inevitably change their buying preferences
