Cisco WebEx™ Meeting Center

Universal Communications Toolkit users Guide

Universal Communications Format Toolkit Overview

The Universal Communications Format Toolkit for Cisco WebEx™ Meeting Center™ is a plug-in program for Microsoft PowerPoint that can help you to create engaging, content-rich Universal Communications Format (UCF) multimedia presentations that you can share in an online meeting. Using the toolkit, you can create PowerPoint slides in which you can play the following types of media files during an online meeting:

- + WebEx Recording Format (WRF) files
- + Video files, including files that play in Windows Media Player and Apple QuickTime
- + Audio files, including files that play in Windows Media Player
- + Flash movie and interactive Flash files
- + Web pages

When you play the media files in your shared slides during an online meeting, playback is synchronised on all participants' screens.

How UCF Works

Once you install the UCF Toolkit, it appears as a new menu and toolbar in Microsoft PowerPoint. You can then use the toolkit to insert media objects into PowerPoint slides.

A media object specifies the location of a media file and includes controls for playback. A media file can be local or remote – that is, it can reside on your computer or another local computer on your network, or on a remote web or streaming server on the Internet.

SHARED UCF MULTIMEDIA PRESENTATIONS

During an online meeting, you can share your UCF multimedia presentation in the content viewer – the area in Meeting Manager in which shared presentations appear – and play back media files using the built-in controls for the media objects that you inserted. The following figure shows an example of a shared slide that includes a video object:
