CLINICAL CHEMISTRY

OVERVIEW OF AUTOMATED CLINICAL CHEMISTRY TESTS

Machines used in sequence:

- For routine chemistry tests:
  - Siemens Dimension
  - Pentra C400
- For blood gas and electrolyte tests:
  - OPTI-CCA TS

Clinical chemistry evaluates the biochemical components of the liquid portion of the blood which is plasma/ serum. Most commonly used specimen is serum.

\*What are the different tests in clinical chemistry?

- **Kidney Function Test** which include creatinine, blood urea nitrogen (BUN) and uric acid.
  - ❖ **Creatinine and BUN** measures kidney function.
  - ❖ **Creatinine** is the more specific test and is done using either enzymatic or colorimetric methods. Enzymatic is said to be the better method for the determination of any laboratory tests.
  - ❖ **Uric acid** is not really a kidney function test but it can also attest kidney function, while it's also an indicator of joint diseases especially rheumatoid, gouty arthritis and other types of arthritis.
- **Liver or Hepatic Panel** this includes ALT (SGPT), AST (SGOT), total protein, albumin, globulin, alkaline phosphatase, direct and indirect bilirubin and GGT (an indicator of alcoholic cirrhosis) while all other test will test liver function.
  - ❖ **Prothrombin time** is also part of the hepatic panel, it can assess several clotting factors and also vitamin K dependent this includes factors 2, 7, 9 and 10.
  - ❖ **Clotting factors: 2, 7, 9, and 10** - independent on prothrombin time because they are *vitamin K dependent*.
- **Thyroid Panel** this includes TSH, Free T3, Free T4, T3 and T4.
  - ❖ All of this test will attest hyperthyroidism, hypothyroidism and euthyroidism.
- **Executive Panel #3/ Cardiac Panel** it will assess cardiac enzymes like the **CKMB (creatine-kinase-MB) and AST**.
  - ❖ The most accurate cardiac enzyme is called the **CKMB** because it is more secreted by the cardiac muscle and it is not so concentrated in the skeletal muscle.
  - ❖ The most specific protein and the most specific cardiac muscle is **Troponin**.
    - It has two types: **Troponin T and Troponin I**
      - Both are specific except the troponin I lacks periodicity compared to troponin T. **Troponin I** is more specific. Other tests in cardiac function although it is not done in the hospital includes *myoglobin* and *AST* (not anymore part of the cardiac panel).

Diagnostic Reasoning Ibrahim A. Hashim, 2025-02-01 Training in clinical chemistry is acquired via different avenues that include didactic lectures on pathophysiology of disease methodologies and practical aspects of testing and through attendance of operations meetings sign out sessions seminars and tutorials There is little instruction on how to apply the vast amount of knowledge gained in the process to practice In other branches of medicine cases are regularly presented with clinical information and therapeutic interventions which form the basis of training Diagnostic Reasoning Laboratory Based Case Studies in Clinical Chemistry fills this gap for clinical chemistry The concise and practical approach of the book including real life scenarios is an excellent resource for pathology trainees clinical laboratory science students clinical chemistry fellows clinical laboratory professionals and clinicians These cases help professionals remain competent in the field and be successful in their board exams The cases are stated as they present often with no or few clinical details accompanying the sample request with only barcoded samples arriving into the laboratory In a busy laboratory thousands of these cases are received daily and it is impossible to review the clinical information associated with the specimens There are no books with a similar approach and emphasis Fills the gap in teaching by addressing the subject from a laboratory practical prospective with concomitant application of evidence based laboratory investigation Presents laboratory data in tabulated format to resemble real life scenarios shows list of abbreviations and conversion factors Cases begin with clinical presentation and information not available to those within the clinical laboratory Discusses the differential diagnosis and suggests additional testing or investigations as necessary *Clinical Chemistry* David N. Bailey, Robert L. Fitzgerald, 2024-12-12 This book is a toolkit for teaching a course on the pathophysiology of disease and how the most widely utilized laboratory tests can be used to diagnose these conditions Tests for the major common diseases are presented by organ system It is also a study guide for students and trainees as they prepare for their respective board examinations Each topic includes succinct text focusing on a disease topic along with a set of PowerPoint lecture slides and clinical cases with answers The toolkit also contains instructions for preparing the teaching laboratories for the course a comprehensive list of differential diagnoses for the most frequent clinical chemistry abnormalities discussion of selected cases taken by pathology residents while on night call and quiz questions with answers Analytical methodology is not presented unless it is important in understanding the test This third edition includes updated material on tumor markers Alzheimer s disease markers markers for pre eclampsia additional drugs for which therapeutic monitoring is available and biomarkers for ethanol abuse among others The comprehensive toolkit is the result of more than 40 years of teaching an introductory course in clinical chemistry to second year medical students at the University of California San Diego Elements of this book have also been used in teaching UC San Diego clinical laboratory scientist training program students pharmacy students clinical chemistry postdoctoral fellows and pathology residents This work has been previously published in two editions 2017 and 2021 by the

American Society for Clinical Pathology ASCP Press under the title Practical Laboratory Diagnosis of Disease Clinical Chemistry **Government Reports Announcements & Index**, 1979-03 *Clinical Chemistry, Immunology and Laboratory Quality Control* Amitava Dasgupta, Amer Wahed, 2013-12-02 All pathology residents must have a good command of clinical chemistry toxicology immunology and laboratory statistics to be successful pathologists as well as to pass the American Board of Pathology examination Clinical chemistry however is a topic in which many senior medical students and pathology residents face challenges Clinical Chemistry Immunology and Laboratory Quality Control meets this challenge head on with a clear and easy to read presentation of core topics and detailed case studies that illustrate the application of clinical chemistry knowledge to everyday patient care This basic primer offers practical examples of how things function in the pathology clinic as well as useful lists sample questions and a bullet point format ideal for quick pre Board review While larger textbooks in clinical chemistry provide highly detailed information regarding instrumentation and statistics this may be too much information for students residents and clinicians This book is designed to educate senior medical students residents and fellows and to refresh the knowledge base of practicing clinicians on how tests are performed in their laboratories i e method principles interferences and limitations Takes a practical and easy to read approach to understanding clinical chemistry and toxicology Covers all important clinical information found in larger textbooks in a more succinct and easy to understand manner Covers essential concepts in instrumentation and statistics in such a way that fellows and clinicians understand the methods without having to become specialists in the field Includes chapters on drug herb interaction and pharmacogenomics topics not covered by textbooks in the field of clinical chemistry or laboratory medicine

Clinical Chemistry - E-Book Donna Larson, 2015-12-17 Gain a clear understanding of pathophysiology and lab testing Clinical Chemistry Fundamentals and Laboratory Techniques prepares you for success as a medical lab technician by simplifying complex chemistry concepts and lab essentials including immunoassays molecular diagnostics and quality control A pathophysiologic approach covers diseases that are commonly diagnosed through chemical tests broken down by body system and category such as respiratory gastrointestinal and cardiovascular conditions Written by clinical chemistry educator Donna Larson and a team of expert contributors this full color book is ideal for readers who may have minimal knowledge of chemistry and are learning laboratory science for the first time Full color illustrations and design simplify complex concepts and make learning easier by highlighting important material Case studies help you apply information to real life scenarios Pathophysiology and Analytes section includes information related to diseases or conditions such as a biochemistry review disease mechanisms clinical correlation and laboratory analytes and assays Evolve companion website includes case studies and animations that reinforce what you've learned from the book Laboratory Principles section covers safety quality assurance and other fundamentals of laboratory techniques Review questions at the end of each chapter are tied to the learning objectives helping you review and retain the material Critical thinking questions and discussion questions

help you think about and apply key points and concepts Other Aspects of Clinical Chemistry section covers therapeutic drug monitoring toxicology transplantation and emergency preparedness Learning objectives in each chapter help you to remember key points or to analyze and synthesize concepts in clinical chemistry A list of key words Is provided at the beginning of each chapter and these are also bolded in the text Chapter summaries consist of bulleted lists and tables highlighting the most important points of each chapter A glossary at the back of the book provides a quick reference to definitions of all clinical chemistry terms
