Abstract

This paper reviews the lessons for evidence-based policy and practice (EBP) arising from the work of the Social Care Institute for Excellence (SCIE), a government-funded agency established in 2001 to improve social care in the UK. The paper describes a ten-year programme developing an *inclusive* approach to what counts as knowledge, and the challenges in ensuring that knowledge is relevant to improving practice in social work and social care. These challenges include reviewing what counts as evidence in EBP, changing the relationship between EBP and practice, and recognising the scientific value (as well as the moral imperative) of including the knowledge held by people who use services. In methodological terms, the work includes developing systematic qualitative synthesis to take account of a broader range of evidence and economic evaluation appropriate to social care. The paper concludes with a discussion of some implications for international debates about the role of evidence-based policy and practice.

Introduction

The background to SCIE and evidence-based policy and practice

SCIE was established in October 2001 as an independent charity with the purpose of improving social care by defining and disseminating best practice. It formed part of the Labour administration's *Quality Strategy for Social Care* (Department of Health, 2000), and reflected concern to reform public
