foundation since the language won't be explained in any detail. You will learn ASP.NET Core 1.1 by building two MVC applications. The first application will be built using an empty template. The goal is to get you familiar with ASP.NET Core 1.1 by adding middleware and services one piece at a time, building a basic application. Then you will build a second MVC application using a template that already contains support for MVC, Entity Framework Core, and user authentication. This application is a video course website where users can register to gain access to video courses. If you are already familiar with MVC 5, the content in this book can get you started with ASP.NET Core 1.1 in a fast, no-fluff way. It's important to mention that this book is practical and tactical where you will learn as you progress through the modules and build real web applications in the process. To spare you countless pages of fluff filler material, only valuable information pertinent to the task at hand is discussed. The benefit is a shorter and more condensed book which will save you time and give you a more enjoyable experience. The goal is to learn ASP.NET Core 1.1 by building two web applications, one from scratch and one from an existing template. This experience is something you can put in your CV when applying for a job or a consultant position or when negotiating a higher salary. Technologies, frameworks, and languages you will use: ASP.NET Core 1.1, MVC, The framework that you will use, Services To provide your own functionality as a reusable service, Middleware To provide your own functionality to HTTP Request pipeline, Entity Framework To create and communicate with a database, View Component To render data in the _Layout view with model data, Razor syntax To include server-side code in views, Bootstrap Used for styling and to create a responsive design, LINQ To query the database, Dependency Injection To inject objects into constructors, Tag Helper to clean up the HTML and enable re-use, HTML Helper methods to clean up your HTML and enable re-use, Bower, NuGet To install necessary front-end/back-end libraries. What you will implement: Implement a web application from an empty template, Implement a web application from an existing template, Create a real-world code-first database using Entity Framework Core, Add and modify models, views, and controllers to perform CRUD operations against the database, Use client-side and server-side validation, Secure the controllers' actions and view content with authorization and roles, Styling HTML with CSS and Bootstrap, Create a responsive website, Register users with the site, Manage users and their video courses.
