Meri, 2006 Publisher description      *The Crisis of Islamic Civilization* Ali A. Allawi, 2009 Islam as a religion is central to the lives of over a billion people but its outer expression as a distinctive civilization has been undergoing a monumental crisis Buffeted by powerful adverse currents Islamic civilization today is a shadow of its former self The most disturbing and possibly fatal of these currents the imperial expansion of the West into Muslim lands and the blast of modernity that accompanied it are now compounded by a third giant wave globalization These forces have increasingly tested Islam and Islamic civilization for validity adaptability and the ability to hold on to the loyalty of Muslims says Ali A Allawi in his provocative new book While the faith has proved resilient in the face of these challenges other aspects of Islamic civilization have atrophied or died Allawi contends and Islamic civilization is now undergoing its last crisis The book explores how Islamic civilization began to unravel under colonial rule as its institutions laws and economies were often replaced by inadequate modern equivalents Allawi also examines the backlash expressed through the increasing religiosity of Muslim societies and the spectacular rise of political Islam and its terrorist offshoots Assessing the status of each of the building blocks of Islamic civilization the author concludes that Islamic civilization cannot survive without the vital spirituality that underpinned it in the past He identifies a key set of principles for moving forward principles that will surprise some and anger others yet clearly must be considered      The different aspects of islamic culture Ahmad, Maqbul, Al-Hassan, Ahmad Youssef, Iskandar, Albert Z., UNESCO, 2002-12-31 Research into Islamic science and technology is still in its early stages but there is now sufficient material available for a preliminary study Volume IV is intended to fill a gap which deserves a major multi volume work Part I is a review of the history of science in Islam It deals with the contribution of Islamic civilization to mathematics astronomy and physics which have long been acknowledged but also advances made by Muslim scientists in the fields of cosmology geology and mineralogy zoology veterinary science and botany      **Aspects of Islamic Civilization as Depicted in the Original Texts** Arthur John Arberry, 1964      **Diversity and Unity in Islamic Civilization** Mirza Iqbal Ashraf, 2017-03-17 An erudite and invaluable contribution to the philosophical religious political cultural and historical dynamism of the Islamic civilization ZARREEN AKBAR Scholar of Islamic Literature In this exceptionally impressive and brilliant book Mirza Ashraf rationally discusses and analyses the diversity and unity in Islamic civilization Addressing many contemporary issues of concern including terrorism he proves philosophically that Islam united different tribes races and nations within its civilization while keeping their socio cultural diversity intact In this process of cultural amalgamation Islam no more remained exclusively an Arab phenomenon It became a multi cultural transnational socio political and economic civilization The author of this illuminating book has shown an intrinsic picture of Islam which I believe could not be more
