INSTALLATION

This thermostat is designed to control floor electric heating systems. The resistive load must not exceed 4000 watts (NI) @ 240 VAC (16.7 A). The thermostat is equipped with a ground fault circuit interrupter (GFCI) and therefore the isolation of the line and load are required for operation. During a ground fault, the two lines of the load will be cut off from the 240 V line. Connect thermostat as shown on diagram.

Electricians or experienced technicians should install the thermostat.

This thermostat is designed to be used with a circuit breaker.

PARTS INCLUDED

- One (1) TH111 GFCI-P (240 VAC) thermostat
- Two (2) 6-32 screws
- Four (4) solderless connectors (for copper wire)
- One (1) temperature sensor with a 15 foot extension

TURN OFF POWER OF THE HEATING SYSTEM AT THE MAIN POWER PANEL TO AVOID ELECTRICAL SHOCK. Keep air vents of the thermostat clean and free from obstructions.

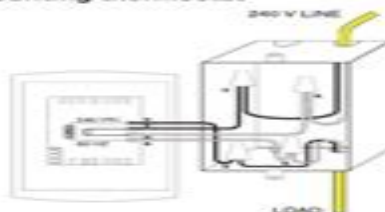

1) Connecting wires and mounting thermostat

Connect the rear thermostat wires to the 240 V LINE and to the load using solderless connectors for copper wires. See schematic diagram.

Push the excess wire back into the electrical box to prevent interference with the thermostat. Secure the thermostat using two (2) 6-32 screws. Once the thermostat is properly installed, return power to heating system.

NOTE: All cables and connections must conform to the local electrical code.

WARNING: Special COVALLR solderless connectors must be used when connecting with aluminum conductors.

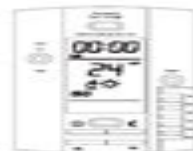

2) Connecting temperature sensor wire

Connect the temperature sensor wire to the two lower screws of the terminal block at the back of the thermostat (no polarity needs to be respected). The wire must pass outside the electrical box and follow the wall down to the floor. The sensing probe should be placed in a representative heat area for maximum system performance. The sensing probe should be centered between the wires in the mat. The temperature sensor wire cannot cross any heater wires and the sensing probe must not be directly or adjacent to a heating wire.

Power-up

When power is applied for the first time, the display must show the time 00:00, the floor temperature and the Manual mode icon (M). Other information might show up on the display if installation is defective or does not comply with the instructions. The warning light (GFI) must be off.

The message LD or HI will appear on the display if the temperature sensor is defective or the temperature is below 0 °C (32 °F) or higher than 60 °C (140 °F). Also, the heating indicator will be present on display and the relay will be closed (current going in the load).

Checking ground fault circuit interrupter (GFCI)

Adjust the setpoint temperature until heating indicator (H) appears on display. Press on TEST button. The test is conclusive if the warning light (GFI) on the thermostat is ON and power to the load is cut-off. If these events do not occur, check the installation. Press on RESET button to reset the GFCI.

If the GFCI test fails: Check the load wires. The thermostat must be in heating mode to carry out the test (heating indicator ON).

The GFCI test should be carried out monthly. If the test fails, cut off the electric power to the heating system and call customer service or return the thermostat to your supplier for verification. If the warning light comes on during normal operation, cut off power to the heating system and have an electrician verify the installation.

OPERATING MODES

The TH111GFCI-P has two (2) operating modes.

MANUAL (M)

This mode allows you to maintain a constant temperature of the floor.

- 1- To activate this mode, press on Mode button to display the M icon.
- 2- Set the desired temperature using the ▲ ▼ buttons or select the pre-programmed 30°C or 15°C settings.
(To select the 30°C setting, press on 30°C and 15°C simultaneously)

AUTOMATIC (A)

This mode executes your own programming.

To activate this mode, press on Mode button to display the A icon. The 30°C or 15°C icon indicates which temperature setting is used. Also, the icon of the program number will be shown.

Le Système périodique Primo Levi, André Mauge, 2000-03-29. Récit de la barbarie nazie à travers l'expérience des camps. Primo Levi a marqué la littérature d'une empreinte très particulière. Si c'est un homme paru en 1947 puis La Trêve en 1963 qui comptent parmi ses œuvres majeures, témoignent avec une effrayante sobriété de cette indicible preuve. Le système périodique se singularise du reste de l'œuvre. Il s'agit ici, première vue de l'autobiographie d'un chimiste. Chaque chapitre est placé sous le signe d'un élément : azote, carbone, plomb, nickel, comme autant de rencontres avec la matière minérale ou ennemie. Mais ces brèves histoires d'un maître qui fut celui de Primo Levi et qui n'est somme toute qu'un cas particulier du maître de vivre sont aussi les souvenirs d'une génération et les tapes d'une jeunesse : les années d'études turinoises, la guerre, la résistance au fascisme, la déportation, le difficile retour à la vie. Le système périodique fait apparaître ce qui caractérise la démarche de Primo Levi et lui donne toute sa force : derrière une écriture sobre et un jugement moral serein, l'impérieux et obsédant besoin de porter témoignage en faveur de la raison et de la dignité humaines. La synthèse quasiment unique de détachement analytique, de compassion humaine et de référence permanente à une hiérarchie absolue de valeurs morales fait de l'œuvre de Primo Levi un exemple de rigoureuse lucidité.

Moi & mon secret Wendy Markham, 2010-12-01. Dans la vie, tout est une question de choix et mon problème moi-même, c'est que je n'arrive jamais me décider. Plutôt cappuccino ou café latte ? Plutôt Jimmy Choo ou Christian Louboutin ? Plutôt Kylie Minogue ou Lady Gaga ? Impossible de prendre une décision. Alors vous imaginez la catastrophe lorsque la veille de mes fiançailles, j'ai fait la connaissance de Mike, un homme beau, drôle, intelligent et qui d'un simple regard m'a fait tourner la tête. Car maintenant, je suis complètement perdue. Que dois-je faire ? Quitter mon adorable fiancé pour un irrésistible inconnu ou prendre le risque de passer côté de l'homme de ma vie ? Cette fois-ci, je le crains, il va falloir que je me décide.

Sauver ou périr Bruno Daviet, 2003. Ils rôdent toujours, l'appel. Parfois leurs silhouettes sombres, bardées de bandes réfléchissantes, apparaissent sur le bord d'une route.
