A Sociology of Sound Technicians Andy Battentier, 2021-07-23 If art and especially music has been framed in cultural sociology as a collective production relying on a variety of actors technicians have been mostly framed as support personnel marginally impacting the meaning of a cultural production This book analyzes sound technicians as technical intermediaries They are autonomous actors of cultural production and contribute in various ways to the meaning of live or recorded music performances framed as a form of interaction rituals From this analysis it argues that artists should not be considered at the center of art worlds and proposes a model including various types of actors in different roles all necessary to produce a cultural object **Audio Engineering for Sound Reinforcement** John

Eargle, Chris Foreman, 2002 Book This up to date book comprehensively covers all aspects of speech and music sound reinforcement It is roughly divided into four sections Section 1 provides the tutorial fundamentals that all audio engineers will need discussing subjects such as fundamentals of acoustics psychoacoustics basic electrical theory and digital processing Section 2 deals with the fundamental classes of hardware that the modern engineer will use such as loudspeaker systems and

components microphones mixers amplifiers and signal processors Special attention is given to digital techniques for system control and to audio signal analysis Section 3 deals with the basics of system design from concept to final realization It covers topics such as basic system type and speech intelligibility site survey user needs analysis and project management Section 4 discusses individual design areas such as sports facilities large scale tour sound systems high level music playback systems for the theater religious facilities and other meeting spaces The book is written in an accessible style but does not lack for ample amounts of technical information It is truly a book for the 21st century The Senior Director of Product Development and Application for JBL Professional John Eargle is the author of The Handbook of Recording Engineering The Microphone Book Handbook of Sound System Design Electroacoustical Reference Data Music Sound and Technology and The Loudspeaker Handbook A 2000 Grammy Award winner for Best Classical Engineering Mr Eargle is an honorary member and past national president of the Audio Engineering Society a faculty member of the Aspen Audio Recording Institute and a member of the National Academy of Recording Arts and Sciences and the Academy of Motion Picture Arts and Sciences

Introduction to Sound System Design and Electro-Acoustics Peter Swarte, 2014-05-01 This book is intended for those who are active with sound amplification and sound distribution The book provides information on adapting sound systems and or transducer to the given acoustics like in open half open and closed spaces An important aspect is how loudspeakers can be adapted to cover all types of surroundings Very often a choice has to be made from a wide range of loudspeakers On the other hand a combination of loudspeakers must be developed and composed in order to adapt the loudspeakers to the given acoustical circumstances The question of which loudspeaker is the correct choice and how they need to be set up so that speech and music are fully comprehensible in all kinds of acoustical and noisy circumstances This book gives a full answer to these questions The reader is also made aware of the design of loudspeakers on the basis of Small and Thiele parameters With thorough calculations and the visibility of the out coming of these calculations by simple software it is possible to convert the acoustic and mechanical elements of the loudspeaker into electrical analogues so that the loudspeaker is simulated on the PC Using an example the calculations mentioned above can be supported Finally the full reference list simplifies the task of the reader in finding the information they require I ve been fascinated by the possibilities of Electro acoustics since I was 10 years old and now I am very pleased to be able to share the knowledge that I built up over 40 years working in the Electro acoustics division of Philips My work experience was supplemented by giving lectures on electro acoustics at the post academic courses on acoustics in Antwerp Belgium
