Machine Learning and Immersive Technologies for User-centered Digital Healthcare Innovation Federico Colecchia, Eleonora Ceccaldi, Daniele Giunchi, Fang Wang, Rui Qin, 2025-06-09 Emerging technologies such as machine learning and immersive technologies including virtual reality and augmented reality hold great potential for driving disruptive healthcare innovation However the adoption of digital technology in healthcare including use of data driven tools in support of clinical decision making and patient facing applications relying on consumer electronic devices is often hindered by issues of user experience trust equitability and fairness There is increasing recognition of a need to facilitate further convergence between the development of emerging technologies and user centered design research for healthcare with a view to achieving a positive impact on patients care professionals and the healthcare system This article collection addresses current development trends relating to user centered digital healthcare innovation based on machine learning and immersive technologies in order to identify opportunities associated with the deployment of new solutions in a range of environments including clinical domestic and educational settings and barriers to the adoption of technology by end users A key aim is to identify opportunities for strengthening interdisciplinary collaboration as well as methods of lowering barriers and overcoming obstacles for the benefit of patients care professionals and the healthcare system Examples of potential outcomes are effective design and use of solutions based on machine learning and immersive technologies to improve user experience strategies to facilitate ethical development of digital technology for healthcare and methods of encouraging adoption of advanced tools developed in line with principles of equitability and fairness Articles should address issues of user centered digital healthcare innovation driven by machine learning and immersive technologies Submissions should ideally be positioned at the intersection of digital technology development with user centered design although contributions more technical in nature as well as user experience studies are also welcome A non exhaustive list of suitable topics and manuscript types is given below Machine learning and or immersive technologies including augmented reality and virtual reality for user centered digital healthcare Clinical decision support systems Patient facing applications Tools for education and training of future medical professionals Potential barriers to adoption of technology issues of user experience trust equitability and fairness in digital healthcare Reviews and contributions discussing the development of intuitive accessible and inclusive digital interfaces All aspects of healthcare that are being or have the potential to be impacted by machine learning and immersive technologies

Biomedical Engineering Tools for Management for Patients with COVID-19 Valentina Emilia Balas, Oana Geman, Guojun Wang, Muhammad Arif, Octavian Adrian Postolache, 2021-06-08 Biomedical Engineering Tools for Management of Patients with COVID 19 presents biomedical engineering tools under research and in development that can be used for the management of COVID 19 patients along with BME tools in the global environment that curtail and prevent the spread of the

virus BME tools covered in the book include new disinfectants and sterilization equipment testing devices for rapid and accurate COVID 19 diagnosis Internet of Things applications in COVID 19 hospitals analytics Data Science and statistical modeling applied to COVID 19 tracking Smart City instruments and applications and more Later sections discuss smart tools in telemedicine and e health Biomedical engineering tools can provide engineers computer scientists clinicians and other policymakers with solutions for managing patient treatment applying data analysis techniques and applying tools to help the general population curtail spread of the virus Provides leading edge biomedical engineering tools and techniques for the treatment of patients with the COVID 19 virus Integrates a variety of case studies as a resource for COVID 19 researchers and clinicians around the world including both positive and negative research findings Provides insights into innovative Biomedical Engineering techniques and devices from COVID 19 researchers around the world

RGB-D Image Analysis and Processing Paul L. Rosin, Yu-Kun Lai, Ling Shao, Yonghuai Liu, 2019-10-26 This book focuses on the fundamentals and recent advances in RGB D imaging as well as covering a range of RGB D applications The topics covered include data acquisition data quality assessment filling holes 3D reconstruction SLAM multiple depth camera systems segmentation object detection salience detection pose estimation geometric modelling fall detection autonomous driving motor rehabilitation therapy people counting and cognitive service robots The availability of cheap RGB D sensors has led to an explosion over the last five years in the capture and application of colour plus depth data The addition of depth data to regular RGB images vastly increases the range of applications and has resulted in a demand for robust and real time processing of RGB D data There remain many technical challenges and RGB D image processing is an ongoing research area This book covers the full state of the art and consists of a series of chapters by internationally renowned experts in the field Each chapter is written so as to provide a detailed overview of that topic RGB D Image Analysis and Processing will enable both students and professional developers alike to quickly get up to speed with contemporary techniques and apply RGB D imaging in their own projects

Autonomous Driving Perception Rui Fan, Sicen Guo, Mohammud Junaid Bocus, 2023-10-06 Discover the captivating world of computer vision and deep learning for autonomous driving with our comprehensive and in depth guide Immerse yourself in an in depth exploration of cutting edge topics carefully crafted to engage tertiary students and ignite the curiosity of researchers and professionals in the field From fundamental principles to practical applications this comprehensive guide offers a gentle introduction expert evaluations of state of the art methods and inspiring research directions With a broad range of topics covered it is also an invaluable resource for university programs offering computer vision and deep learning courses This book provides clear and simplified algorithm descriptions making it easy for beginners to understand the complex concepts We also include carefully selected problems and examples to help reinforce your learning Don't miss out on this essential guide to computer vision and deep learning for autonomous driving

Augmented reality using the kinect camera Jonathan De Wolf, 2013

Realization of a Spatial Augmented Reality System - a

Digital Whiteboard Using a Kinect Sensor and a PC Projector Andrei A Kolomenski,2013 Recent rapid development of cost effective accurate digital imaging sensors high speed computational hardware and tractable design software has given rise to the growing field of augmented reality in the computer vision realm The system design of a Digital Whiteboard system is presented with the intention of realizing a practical cost effective and publicly available spatial augmented reality system A Microsoft Kinect sensor and a PC projector coupled with a desktop computer form a type of spatial augmented reality system that creates a projection based graphical user interface that can turn any wall or planar surface into a Digital Whiteboard The system supports two kinds of user inputs consisting of depth and infra red information An infra red collimated light source like that of a laser pointer pen serves as a stylus for user input The user can point and shine the infra red stylus on the selected planar region and the reflection of the infra red light source is registered by the system using the infra red camera of the Kinect Using the geometric transformation between the Kinect and the projector obtained with system calibration the projector displays contours corresponding to the movement of the stylus on the Digital Whiteboard region according to a smooth curve fitting algorithm The described projector based spatial augmented reality system provides new unique possibilities for user interaction with digital content The electronic version of this dissertation is accessible from <http://hdl.handle.net/1969.1/149299>

Augmented Human Helen Papagiannis,2017-08-17 Augmented Reality AR blurs the boundary between the physical and digital worlds In AR s current exploration phase innovators are beginning to create compelling and contextually rich applications that enhance a user s everyday experiences In this book Dr Helen Papagiannis a world leading expert in the field introduces you to AR how it s evolving where the opportunities are and where it s headed If you re a designer developer entrepreneur student educator business leader artist or simply curious about AR s possibilities this insightful guide explains how you can become involved with an exciting fast moving technology You ll explore how Computer vision machine learning cameras sensors and wearables change the way you see the world Haptic technology syncs what you see with how something feels Augmented sound and hearables alter the way you listen to your environment Digital smell and taste augment the way you share and receive information New approaches to storytelling immerse and engage users more deeply Users can augment their bodies with electronic textiles embedded technology and brain controlled interfaces Human avatars can learn our behaviors and act on our behalf

Augmented Reality Games II Vladimir Geroimenko,2019-05-23 This is the second of two comprehensive volumes that provide a thorough and multi faceted research into the emerging field of augmented reality games and consider a wide range of its major issues These first ever research monographs on augmented reality games have been written by a team of 70 leading researchers practitioners and artists from 20 countries Volume II explores the most important and challenging issues that have been raised by the use of the Augmented Reality approach and technology in the gamification of education healthcare medicine and art The volume deals with a systematic analysis of educational augmented reality games their use for health promotion in old age and for improving people s well

being the gamification of augmented reality art and immersive reading experiences among other topics Augmented Reality Games II is essential reading not only for researchers practitioners game developers and artists but also for students graduates and undergraduates and all those interested in the rapidly developing area of augmented reality games

Augmented Reality With Kinect Wang Rui Book Review: Unveiling the Magic of Language

In an electronic era where connections and knowledge reign supreme, the enchanting power of language has become much more apparent than ever. Its power to stir emotions, provoke thought, and instigate transformation is actually remarkable. This extraordinary book, aptly titled "**Augmented Reality With Kinect Wang Rui**," compiled by a very acclaimed author, immerses readers in a captivating exploration of the significance of language and its profound effect on our existence. Throughout this critique, we will delve into the book's central themes, evaluate its unique writing style, and assess its overall influence on its readership.
