

Small 100% setting

Medium 100% setting

Large 100% setting

The median of the distribution of small 100% setting is 100, which is smaller than the average. The median of the distribution of medium 100% setting is 100, which means it has a 100% setting better than average. And the median of the distribution for large 100% is 100, meaning it's better than average. Comparing the two for the median, it appears that small 100% is better than average and medium 100% is better than average and large 100%. The interquartile range for small 100% is 100, which means that it has a range of 100 to 100, and the range for large 100% is 100, which means that it has a range of 100 to 100, which is the same as the other two distributions. The range also measures the spread of the small 100% setting. The small 100% has a width of 100, which is the same as the other two distributions, and it appears that it is the best choice. But small 100% has the lowest average setting between 100% and 100% better than the other two and large 100%.

Auto Safety Ap Statistics Investigative Task Answer

United States. Congress

Auto Safety Ap Statistics Investigative Task Answer:
