Automating with SIMATIC S7-1200 Hans Berger, 2013-04-22. The SIMATIC S7 1200 PLC offers a modular design concept with similar functionality as the well known S7 300 series. Being the follow up generation of the SIMATIC S7 200, the controllers can be used in a versatile manner for small machines and small automation systems. Simple motion control functionalities are both an integral part of the micro PLC and an integrated PROFINET interface for programming HMI link and CPU-CPU communication. As part of Totally Integrated Automation TIA Portal, the engineering software STEP 7 Basic offers a newly developed user interface which is matched to intuitive operation. The functionality comprises all interests concerning automation: From configuring the controllers via programming in the IEC languages LAD, ladder diagram, FBD, function block diagram, and SCL, structured control language, up to program testing. The book presents all of the hardware components of the automation system S7 1200 as well as its configuration and parameterization. A profound introduction into STEP 7 Basic V11 illustrates the basics of programming and trouble shooting. Beginners learn the basics of automation with SIMATIC S7 1200 and advanced users of S7 200 and S7 300 receive the knowledge required to work with the new PLC. Users of STEP 7 Professional V12 will easily get along with the descriptions based on the V11. With start of V12, the screens of the technology functions might differ slightly from the V11.

LOGO! 8 Stefan Kruse, 2015-04-13. Addressing students and engineers but also hobby engineers, this practical guide will help to easily and cost effectively implement technical solutions in home and installation technology as well as small scale automation solutions in machine and plant engineering. The book descriptively illustrates how to plan LOGO 8 projects, develop programs, and how to select the hardware. Standard control technology scenarios are demonstrated by building on the fundamentals of modern information technology and with the help of several real life sample switches. In addition, readers are provided with practice oriented descriptions of various basic and special LOGO 8 modules with which specific tasks can be very flexibly implemented. Compared to former generations and competing products, LOGO 8 comprises an integrated Ethernet interface, easy Internet control, a space saving design, and also more digital and analog outputs. The basic and special functions of the logic module can be used to replace several switching devices. Equipped with an Ethernet interface and a Web server, LOGO 8 devices offer

more functionalities for remote access via smartphone or other devices With the LOGO Soft Comfort V8 software program and communication functions for up to 16 network users can be conveniently programmed and simulated
