Bilingual Literacy Development at Home Yang Wang, 2025-09-30 This book explores pedagogical implications for how children read, write, respond to literature, and begin to learn an additional language in the home context. Using a longitudinal ethnographic study, it explores a bilingual child's literacy development over a span of four years, from kindergarten to the third grade, in a real-life home context in the United States. Written from a parent-researcher's perspective, it illustrates the child's Mandarin Chinese and English language support at home and in the community during the pandemic and charts the development in bilingual reading and writing. Multimodal reading responses to children's literature and learning Spanish as a third language. Through rich and detailed descriptions, the case study methodology allows a clear articulation of the project's focus and foregrounds the exploration of reading as a sociopsycholinguistic process, as well as highlighting multimodality in reading and writing responses, translinguaging, and bilingual and bicultural identities to study and teach culturally and linguistically diverse children. It will be a valuable resource for literacy researchers, scholars, and bilingual educators with interests in sociolinguistics, literacy education, bilingualism, and translinguaging.

The EAL Teaching Book Jean Conteh, 2019-04-29

This book is a complete guide to understanding learning from and teaching bilingual and EAL children in schools. It begins by asking who are EAL learners and challenges some of the misconceptions about this group. It goes on to examine language in depth, providing focused theory to help teachers and trainees better understand the wider context of children's needs. This theory is supported by a wealth of information on practical teaching strategies and resources. It also covers planning across the curriculum for EAL, assessing EAL and bilingual learners and classroom organisation. New to this second edition is a chapter on using home languages and cultures in learning as well as many new case studies from practising teachers offering insight and knowledge on teaching this particular group. The Beliefs and Experiences of World Language Teachers in the US Pamela M. Wesely, 2024-06-11

This book tells the stories of 15 world language (WL) teachers in the United States at elementary and secondary levels through rich descriptions of their lived worlds and experiences. In-depth interviews, extensive observations, learner interviews and document and environment analysis illustrate in detail how teacher beliefs relate to their practices and are mediated and moderated by their learners, institutional demands, equity and access to WL education and other factors. The chapters provide a deep and robust explanation of individual teachers' teaching lives and a cross-contextual comparison of their experiences, shining a light on the realities and demands of modern US schools. Grounded in the research literature on language teacher beliefs and cognition, this book takes the stance that all teaching is situated and contextual and that addressing teachers' methods, practices and knowledges in ways that are divorced from their setting and environment has serious limitations. It offers fascinating insights for researchers, language educators and pre- and in-service teachers with reflection questions at the end of each chapter to guide readers in drawing connections with their own practice interests and contexts. **Cambridge English Empower Elementary Teacher's Book** Adrian Doff, Tim Foster, Ruth Gairns, Stuart Redman, Wayne Rimmer, 2015-01-29
