Communication and Peace Julia Hoffmann, Virgil Hawkins, 2015-02-11 This book analyses the use of communication in resolving conflicts with a focus on de escalation and processes of peacebuilding and peace formation From the employment of hate radio in the Rwanda genocide to the current conflict between Russia and the Ukraine following events in the Crimea communication and the media are widely recognized as powerful tools in conflicts and war Although there has been significant academic attention on the relationship between the media conflict and war academic efforts to understand this relationship have tended to focus primarily on the links between communication and conflict rather than on communication and peace In order to make sense of peace it is essential to look at communication in its many facets mediated or not This is true within many of the diverse strands that make up the field of communication and peace but it is also true in the sense that a holistic and interdisciplinary approach is missing from the literature This book addresses this widely acknowledged lacuna by providing an interdisciplinary perspective on the field bringing together relevant but so far largely isolated streams of research In doing so it aims to provide a platform for further reflection of the meaning of and requirements for peace in our contemporary world with a focus on de escalation conflict transformation reconciliation and processes of peacebuilding as opposed to conflict escalation or crisis intervention This volume will be of much interest to students of peace and conflict studies peacebuilding media and communication studies security studies and IR in general

Gender and Peacebuilding Maureen P. Flaherty, Thomas G. Matyók, Sean Byrne, Hamdesa Tusso, 2015-10-16 The twenty first century has brought with it a shift from the notion of human security being located in secure national borders to the need to secure the safety freedom and dignity of all Despite efforts to equalize women s status in the world evidenced by changes in many international projects requiring a gender focus women and men experience most of the world in very different ways according to gender Further the reality is that humans who do not all fall neatly into one of these categories male or female often find their lives further challenged In the 1980s Peace and Conflict Studies first began to acknowledge and study the different experiences males and females have during war and peace Since then there have been books about women and war women working at grassroots levels to build peace women and transitional justice women and peace education and women s views of human security All of these works have contributed to the discourse of our changing world This book brings together some of those themes and voices and adds more with the final product being more than the sum of its parts We add to the conversation a book that considers foundational fundamental issues that span from the interpersonal to the global Many of

the chapters describe empirical research completed with author and community shared here for the first time Part One is a collection of case studies documenting challenges and responses to peacebuilding by women from various parts of the world Part Two focuses on Peace and Conflict Studies PACS as a discipline examining not only what is but also what should be taught This section critiques today s efforts at teaching Peace and Conflict Studies and provides suggestions of how this important work might be shared in more open and equitable ways Part Three enters territory found even less in the PACS literature In this section our authors confront patriarchy engage in a discussion about the contribution queer theory makes to PACS and tussle with the notion of inclusivity with considerations of both gender and disability It then ends with a discussion about the contribution feminist methodologies make to PACS
