Torque, 2006-07 Singapore's best homegrown car magazine with an editorial dream team driving it. We fuel the need for speed. **2016 Passenger Car and 2015 Concept Car Yearbook** Automotive Engineering International, 2015-12-15. Carmakers release new models every year with advanced technology to attract consumer interest and to satisfy increasingly stringent government regulations. Some of these technologies are firsts or leading edge and they start trends that more companies will soon follow. Snapshots of the direction of the automotive industry along with OEM and supplier perspectives are presented in these articles that have been collected by the Editors of Automotive Engineering whose aim is to provide the reader with a complete overview of the key advances that took place over the course of one model year. Provides a single source for information on the key engineering trends of one year. Allows the reader to skip to chapters that cover specific car models that interest them or read about all models from beginning to end. Includes plenty of big full color images and the facts about the most recent technology and engineering innovations. Each car manufacturer has its own chapter exploring new models in depth. The yearly trends and innovations that make the automotive industry fascinating to both the engineer and the customer are all captured in the imagery and easy reading of this full color book. **Lemon-Aid New Cars and Trucks 2012** Phil Edmonston, 2011-12-03. Phil Edmonston Canada's automotive Dr Phil pulls no punches. He says there's never been a better time to buy a new car or truck thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all new guide he says Audis are beautiful to behold but hell to own, biodegradable transmissions, rodent snack wiring, and mind boggling depreciation. Many 2011-12 automobiles have chin to chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind tunnel roar if the rear windows are opened while underway. Ethanol and hybrid fuel saving claims have more in common with Harry Potter than the Society of Automotive Engineers. GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that killed its own electric car more than a decade ago. You can save 2,000 by cutting freight fees and administrative charges. Diesel annual urea fill-up scams cost you 300 including an 80 handling charge for 25 worth of urea. **Lemon-Aid New Cars and Trucks 2011** Phil Edmonston, 2010-11-11. As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality control problems, Lemon Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car and truck books on the market. Phil Edmonston Canada's automotive Dr Phil for more than 40 years pulls no punches. In this all new guide he says Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of zombie vehicles. Jaguar, Land Rover, Saab, and Volvo Mercedes-Benz rich cars, poor quality. There's only one Saturn you should buy. Toyota enough apologies when
