Introduction to Auditing

Meaning and Definition of Auditing

The word Audit is derived from Latin word "Audire" which means 'to hear'. Auditing is the verification of financial position as disclosed by the financial statements. It is an examination of accounts to ascertain whether the financial statements give a true and fair view financial position and profit or loss of the business. Auditing is the intelligent and critical test of accuracy, adequacy and dependability of accounting data and accounting statements. Different authors have defined auditing differently, some of the definition are:

"Auditing is an examination of accounting records undertaken with a view to establishment whether they correctly and completely reflect the transactions to which they purport to relate." - **L.R.Dicksee**

"Auditing is concerned with the verification of accounting data determining the accuracy and reliability of accounting statements and reports." - **R.K. Mautz**

"Auditing is the systematic examination of financial statements, records and related operations to determine adherence to generally accepted accounting principles, management policies and stated requirement." - **R.E.Schlosser**

Objectives of Auditing

The objectives of auditing are changing with the advancement of business techniques. Earlier it was only to check the correctness of receipts and payments. The objectives of the auditing have been classified under two heads:

- 1) Main objective
- 2) Subsidiary objectives

Main Objective: The main objective of the auditing is to find reliability of financial position and profit and loss statements. The objective is to ensure that the accounts reveal a true and fair view of the business and its transactions. The objective is to verify and establish that at a given date balance sheet presents true and fair view of financial position of the business and the profit and loss account gives the true and fair view of profit or loss for the accounting period. It is to be established that accounting statements satisfy certain degree of reliability. Thus the main objective of auditing is to form an independent judgement and opinion about the reliability of accounts and truth and fairness of financial state of affairs and working results.

Auditing Notes For Bcom :

The Calendar University of South Africa,1992 **The symbiosis between information system project complexity and information system project success** Carl Marnewick,Wikus Erasmus,Nazeer Joseph,2017-12-01 Project success is widely covered and the discourse on project complexity is proliferating The purpose of this book is to merge and investigate the two concepts within the context of information system IS projects and understand the symbiosis between success and complexity in these projects In this original and innovative research exploratory modelling is employed to identify the aspects that constitute the success and complexity of projects based on the perceptions of IS project participants This scholarly book aims at deepening the academic discourse on the relationship between the success and complexity of projects and to guide IS project managers towards improved project performance through the complexity lens The research methodology stems from the realisation that the complexity of IS projects and its relationship to project success are under documented A post positivistic approach is applied in order to accommodate the subjective interpretation of IS project participants through a quantitative design The researchers developed an online survey strategy regarding literature concerning the success and complexity of projects The views of 617 participants are documented In the book descriptive statistics and exploratory factor analysis pave the way for identifying the key success and complexity constructs of IS projects These constructs are used in structural equation modelling to build various validated and predictive models Knowledge concerning the success and complexity of projects is mostly generic with little exposure to the field of IS project management The contribution to current knowledge includes how the success of IS projects should be considered as well as what the complexity constructs of IS projects are The success of IS projects encompasses strategic success deliverable success process success and the unknowns of project success The complexity of IS projects embodies organisational complexity environmental complexity technical complexity dynamics and uncertainty These constructs of success and complexity are mapped according to their underlying latent relationships to each other The intended audience of this book is fellow researchers and project and IS specialists including information technology managers executives project managers project team members the project management office PMO general managers and executives that initiate and conduct project related work The work presented in this first edition of the book is original and has not been plagiarised or presented before It is not a revised version of a thesis or research previously published Comments resulted from the blind peer review process were carefully considered and incorporated accordingly **Handbook of Management Accounting** Roger Cowe,1988 *Accountancy* ,1982

Information technology project managers' competencies: An analysis of performance and personal competencies Carl Marnewick,Wikus Erasmus,Nazeer Joseph,2016-12-31 The purpose of this book is to shed light on the performance and personal competencies of information technology IT project managers in South Africa Predictive models are built to determine what project managers consider the crucial competencies they should possess to deliver an IT project successfully

This investigation takes place in the context of poor IT project success rates globally and in particular in South Africa. This novel research seeks to extend the debate on project success beyond what constitutes success or failure but seeks to find clarity in what IT project managers believe are the essential competencies in practice. This quantitative research gathered data by way of an online survey based on literature regarding the Project Management Competency Development Framework (PMCDF). The population consisted of IT project managers in South Africa. Four hundred and two respondents chose to share their insights. Through the use of descriptive and multivariate statistics, major competency factors were identified. These factors were used in structural equation modelling to build various validated predictive models. This book contributes to the current body of knowledge by uncovering the competencies that IT project managers consider themselves competent in. The structural equation models indicated predictors of perceived competence by IT project managers and where these perceived competencies differ from literature. Twelve managerial implications are highlighted in the final chapter that seek to draw the myriad threads together into a coherent summary. It is apparent that IT project managers do not consider the PMCDF important in its entirety but instead choose to focus on certain competencies.

Accounting theories, practices, education and human capital formation trends, 2025-09-15

This book aims to provide empirical and conceptual insights into contemporary accounting theories, practices, education, and approaches adopted to advance human capital formation in the discipline. Although new accounting practices have emerged in the modern world, conceptual and empirical research that provides a

holistic comprehensive understanding of these evolutions and human capital approaches used to promote capabilities formation in accounting remains scarce Contemporary research often focuses on developing a framework for integrating accounting practices while coverage of human capital development is limited Instead research strands on accountancy and human capital are growing separately without a comprehensive empirical and conceptual framework for integrating the two concepts Insights on accounting practices and human capital developments are necessary for building a holistic understanding of the two concepts and working towards adopting an interdisciplinary approach The findings in this book seek to advocate for the need to develop highly skilled generations who may meet the requisite accounting and financial capabilities required in the modern global economy This book adopts both conceptual and empirical methods to address the gap in the literature on the need for research that focuses on human capital formation in the accounting and finance discipline It contributes an interdisciplinary perspective on the intersectionality between accounting practice and the human capital formation of individuals who possess the requisite knowledge
